Objective of the bank and Nature of business

Societe Generale Ghana Limited is a public limited liability company incorporated under the Companies Act of Ghana 1963 Act 179 as amended by the Companies (Amendment) Act 2012 Act 835. The company which is a Bank is listed on the Ghana Stock Exchange. The Company is licensed by the Bank of Ghana as a Universal Bank in Ghana under the Banks and Specialized Deposit Taking Institutions Act, 2016 Act 930.

Holding company

The Societe Generale Group through its wholly owned investment subsidiary SG Financial Services Holding owns 60.22% of the issued capital of the Bank, thus making Societe Generale Ghana Limited a subsidiary of the Societe Generale Group.

Subsidiary

SSB Investments Company Limited, a company incorporated in Ghana to manage the equity investments of the Bank is a wholly owned subsidiary of the Bank. The nature of the business which the company is authorized to carry on are:-

- To carry on the business of an investment company and for that purpose to acquire and hold either in the name of the company or in that of any nominee, shares, stocks, debentures, bond notes and securities issues;
- To take over and manage all investments of the Bank Limited;
- To do all such other things which may seem to the company's directors to be incidental or conducive to the attachment of the objects.

SSBI has been inactive for some time now since all the investments which were held under it had been sold. In order to comply with Section 73 (3) of the Banks and Specialized Deposit Taking Institutions Act, 930 of 2016 which provides that a Bank or Specialized Deposit Taking institution shall not invest or hold investments in the share capital of a body corporate other than a subsidiary of that bank or specialized deposit taking institution that represents more than 5% interest in the body corporate, the Bank is currently working on operationalizing SSB Investments Company Limited for IFRS and Regulatory Reporting. The Bank has therefore put in place processes to make SSB Investments Limited operational and functional in order to be able to use it as a vehicle to hold all its other investments that exceed the regulatory 5% threshold.

Stated capital

The Bank has complied with the minimum stated capital requirement for universal banking as directed by the Bank of Ghana.

Societe Generale Ghana Limited
Report of the Directors - continued

Changes in Board of Directors and Senior Management

None of the other Directors had any interest in the shares of the Bank's subsidiary at any time during the year. None of the Directors had a material interest in any contract of significance with the Bank during the year.

Dividend

The Board of Directors have recommended a dividend payment of GHS 0.04 per share for the ended 31 December 2018.

Corporate Responsibilities and Compliance: Policy and performance in connection with environmental and social responsibility.

The Bank has a Policy on Environmental and Social Management Systems which was approved by the Board of Directors on 25th July 2014. It also has an Environmental and Social Management Systems Charter which was duly approved by the Board of Directors of the Bank on 26th July 2013. Societe Generale Ghana, considers that the banking and financial sector is an essential contributor to the economic development. Fully aware of its role in assisting the economic sphere, Societe Generale Ghana is committed to conducting its activities in a responsible way. Taking into account the economic, environmental and social consequences and impacts of its activities is a major focus of the Bank's sustainable development policy.

Based on continuous improvement, sustainable development as interpreted by Societe Generale Ghana draws on best practices of the Societe Generale Group and the other economic sectors. The objective of the Bank is to better understand, manage and improve its impacts on society and the environment, in conjunction with its stakeholders.

Societe Generale Ghana has established an Environmental and Social Management Systems (ESMS) General Guidelines. The ESMS General Principles stem from the legal and regulatory framework applicable to the Bank's activities. They are implemented through processes and procedures adapted to the different activities of the Bank. The Guidelines outline the key standards and parameters enabling a responsible engagement of Societe Generale Ghana in all its activities. They may evolve in time, according to legislative or regulatory evolutions and as a result of the discussions between the Bank and its various stakeholders. The scope of these guidelines apply to banking and financial services provided by Societe Generale Ghana.

Societe Generale Ghana complies with the Environmental and Social laws and regulations in force in Ghana and with the applicable international Environmental and Social conventions and agreements. Societe Generale Ghana being part of the Societe Generale Group adopts and respects the values and principles enshrined in the following international conventions and agreements:

- the Universal Declaration of Human Rights and associated covenants (namely, the International Covenant on Civil and Political Rights and the International Covenant on Economic, Social and Cultural Rights);
- the main Conventions of the International Labour Organization;
- the UNESCO Convention concerning the Protection of the World Cultural and Natural Heritage;
- the OECD Guidelines for Multinational Enterprises.
- the UNEP Finance Initiative;
- the UN Global Compact;
- the Equator Principles.

Legal and regulatory obligations and adoption of the above standards and initiatives entail that Societe Generale Ghana shall not knowingly finance transactions linked to certain goods and services defined in its policy.

Corporate Governance Directive by the Bank of Ghana December 2018

The Bank of Ghana issued a Corporate Governance Directive December 2018 the objectives of which are to require Regulated Financial Institutions to adopt sound corporate governance principles and best practices to enable them under take their licensed business in a sustainable manner; to promote the interest of depositors and other stakeholders by enhancing corporate performance and accountability of the Regulated Financial Institutions; and to promote and maintain public trust and confidence in Regulated Financial Institutions by prescribing sound corporate governance standards which are critical to the proper functioning of the banking sector and the economy as a whole.

Sound Corporate Governance Standards

The Board of Directors of the Bank have overall responsibility for the Company including approving and overseeing the implementation of the strategic objectives, risk strategy, corporate governance and corporate values. The Board is responsible for appointing and providing oversight of Senior Management. These responsibilities are set out in the formal Charter of the Board. The Charter was duly approved by members on 28th November 2018. The Board ensures that a well-structured and rigorous selection system is in place for the appointment of Key Management Personnel through the Recruitment Policy of the Bank and the Board validates the appointment of Key Management Personnel prior to submitting same to the Bank of Ghana for approval.

Societe Generale Ghana Limited

Report of the Directors - continued

Annual Certification

As requested by the Bank of that certification within 90 days, at the beginning of each financial year, the Board of Directors of the Bank certify general compliance with the Bank of Ghana Corporate Governance Directive December 2018. The Board further certifies that:-

- i. The Board has independently assessed and documented the corporate governance process of the Bank and has generally achieved its objectives.
- ii. The Directors are aware of their responsibilities to Bank as persons charged with governance

The Board further confirms that shall report any material deficiencies and weaknesses that have been identified in the course of the year along with action plans and time tables for the corrective action by the Board to the Bank of Ghana.

Business Strategy

The Board approves and monitors the overall business strategy of the Bank taking into account long-term financial interest of the company its exposure to risk, and its ability to manage risk effectively. The Board approves and oversee the formulation and implementation of the:-

- overall risk strategy, including its risk tolerance/appetite;
- policies for risk, risk management and compliance, including anti-money laundering and combating the financing of terrorism risk;
- internal controls system;
- corporate governance framework, principles and corporate values including a code of conduct
- compensation system

Duty of Care and Loyalty

The members of the Board exercise a “duty of care” and “duty of loyalty” to the Company all times which is stipulated in the Companies Act 1963 and the Regulations of the Bank.

Corporate culture and values

The Board has established a corporate culture and values for the Company that promote and reinforces norms for responsible and ethical behaviour in terms of the Bank’s risk awareness, risk-taking and risk management. The Company has in place a Code of Conduct and a Conflict of Interest Policy duly approved by the Board of Directors.

To promote sound corporate culture in the Company the Board has taken the lead and established the tone at the top by Setting and adhering to corporate values for itself, key management and employees that create expectations that business should be conducted in a legal and ethical manner at all times; and ensuring that appropriate steps are taken to communicate throughout the Company, the corporate values, professional standards it sets together with supporting policies and appropriate sanctions for unacceptable behaviours.

Related Party Transactions

The Board ensures that transactions with related parties including internal group transactions are reviewed to assess risk and are subject to appropriate restrictions by requiring that such transactions be conducted on non-preferential terms basis and applicable legislation and other requirements exposure limits for loans to related parties and staff.

Plan for Succession

The Board has duly approved a succession plan and duly submitted same to the Bank of Ghana for approval. The succession plan focuses on developing human resources to enable the Company to retain a pool of qualified candidates who are ready to compete for key positions and areas when they become vacant to ensure effective continuity of the Bank.

Societe Generale Ghana Limited
Report of the Directors - continued

Key Management Oversight

The Board provides oversight of Senior Management as part of the Company's checks and balances and

- a) monitors and ensure the actions of Senior Management through reports from Management consistent with the strategy and policies approved by the Board, including the risk tolerance appetite and risk culture;
- b) meet regularly with Senior Management through the Board sub committees;
- c) questions and review critically explanations and information provided by senior management;
- d) ensure that the knowledge and expertise of senior management remain appropriate given the nature of the business and the Bank's risk profile.

- f) Ensure that appropriate succession plans are in place for senior management positions.
- g) Oversee the design and operation of the Company's compensation system, monitor and reviews the system to ensure that it is aligned with the desired risk culture and risk appetite of the Company
- h) Approve the overall internal control framework of the Company and monitor its effectiveness

Separation of Powers

There is a clear division of responsibilities at the top hierarchy of the Company. The positions of the Board Chair and the Managing Director are separate. The two top positions of Board Chair and Managing Director in the company are not occupied by foreigners. The Chairman is a Ghanaian National and the Managing Director is a French National. Further no two related persons occupy the positions of Board Chair and Managing Director of the Company

Independent Director

The Board of Directors are in the process of ensuring and achieving convergence on the position of Independent Directors with an updated self-appraisal. The Board will also on-board new Independent Directors by the end of 2019. The Board of Directors will ensure that and an Independent director shall be non-executive and shall not:-

- a) hold cross directorship positions with another directors on the Board of other institutions
- b) be a director on the Board of an institutional shareholder with significant equity interest in the Regulated Financial Institution.
- c) have more than 5% equity interest directly or indirectly in the Company or in its related companies;
- d) be employed in an executive position in the Company or its related company at least 2 years prior to his appointment date;
- e) have relatives employed by the Company or any of its related companies as Key Management Personnel in the last two (2) years;
- f) have engaged in any transaction within the last two (2) years with the Company on terms that are less favourable to the Company than those normally offered to other persons; or
- g) have served as a director in the Company continuously for more than two (2) terms unless the director can affirm that his/her independence is not impaired.
- h) be related to persons with significant shareholding in the Company or have any business or employment connections to a significant shareholder

Board Qualifications and Composition

Board members have the requisite qualification as Directors of a leading Bank in Ghana that is listed on the Ghana Stock Exchange. They are however awaiting training from the National Banking College but were trained on Compliance internally in February 2019. The Board of Directors have a clear understanding of their role in corporate governance and are able to exercise sound and objective judgment about the affairs of the Company. They possess, individually and collectively, appropriate experience, competencies and personal qualities, including professionalism and integrity.

The competencies of Boards are diverse to facilitate effective oversight of Management and shall cover a blend of Banking, Law, Finance, Accounting, Economics, Business Administration, financial analysis, Risk Management, Strategic planning and Corporate Governance.

The Board collectively have a reasonable knowledge and understanding of local, regional and global economic market forces as well as legal and regulatory environment in which the Company operate.

Ghanaian nationals, ordinarily resident in Ghana, constitute at least 30% of the Board composition of the Company.

The Board of Directors are assiduously working to ensure that by 31st December 2019 that Independent Directors constitute at least 30% of the composition of the Board of the Company.

Board Size and Structure

As at 31st December 2018 the Board members were 8 including the Chairperson the majority of which were non-executive and ordinarily resident in Ghana. There is an appropriate balance of power and authority on the Board between the executive and non-executive directors and no individual or group shall dominate the Board's decision-making process.

Societe Generale Ghana Limited

Report of the Directors - continued

Directors' Appointments and Managing Director Tenure

The procedure for appointment of directors to the Board is formal and transparent and conform to the Directive issued by the Bank of Ghana on fit and proper persons. The Bank complies with the Bank of Ghana in respect of the Tenure of the Managing Director of 12 years.

Appointment of Key Management Personnel

The Bank ensures that submits to the Bank of Ghana before it appoints a Key Management Personnel, an Enhanced Due Diligence Report on proposed nominees as Key Management Personnel. The Bank also conducts police criminal background checks; Obtains references from previous employers and 2 other reputable persons; notifies the Central Bank about the recruitment of Key Management personnel and obtains approval

Alternate Director

The Bank does not currently have any alternate directors.

Board Chairman

The Chairman of the Board is a non-executive Director and is ordinarily resident in Ghana. The Chairman provides leadership to the Board and ensures that Board decisions are taken on a sound and well-informed basis. The Chairman encourages and promotes critical discussion and ensure that dissenting views can be expressed and discussed within the decision-making process. The Chairman encourages constructive relationship within the Board and between the Board and Management. He promotes checks and balances in the governance structure of Bank. He does not serve as a Chairman of any of the Board sub committees. The Board of Directors are working on achieving convergence with the tenure of the Board Chairman by 31st December 2019.

The Board Secretary

The Board Secretary serves as an interface between the Board and Management and support the Chairman in ensuring the smooth functioning of the Board. The Board Secretary advises the Board on matters relating to statutory duties of the directors under the law, disclosure obligations, and company law regulations as well as on matters of corporate governance requirements and effective Board processes. The Board Secretary ensures that directors are provided with complete, adequate and timely information prior to Board meetings.

Board Meetings

The Company holds a minimum of 4 Board meetings annually in February; April, July and November. It also has one Annual General Meeting in March. In compliance with the Bank of Ghana's Directive on Corporate Governance, the Board hereby discloses the total number of Board meetings and the attendance rate of each Director below:-

Board Performance Evaluation

The Board carries out self-assessment of its performance for individual Board members in order to review the effectiveness of its own governance practices and procedures and will for 2019 include Anti-Money Laundering and Counter Financing of Terrorism (AML/CFT) issues, to determine where improvements may be needed and make any necessary changes.

The Board will ensure that it undertakes a formal and rigorous evaluation of its performance with external facilitation of the process every two (2) years.

Report on Board Evaluation

An in-house performance evaluation of the Board is conducted annually and a copy of the results submitted to the Bank of Ghana not later than 30th June of each year.

A separate in-house performance evaluation of the Board on AML/CFT issues shall be submitted to the Bank of Ghana and the Financial Intelligence Centre for June and December each year before the end of the quarter following the evaluation period.

A statement on the external evaluation of the Board shall be included as a separate section of the annual report of Regulated Financial Institution and a detailed copy of the report submitted to the Bank of Ghana. This will be undertaken once every two years.

Board Sub-Committees

The Board has in place an Audit & Accounts Committee; a Risk Committee and a Nomination & Compensation Committee. The Board is working on achieving convergence with the Corporate Governance Directive as regards the composition of the sub committees.

The Chief Risk Officer, the Chief Compliance Officer and the Head of Internal Audit report directly to the Board via the Sub Committee and the Managing Director.

Conflicts of Interest

The Board has in place a Conflict of Interest Policy which includes:-

- a) the duty of the director to avoid possible activities that could create conflicts of interest;
- b) a review or approval process for directors to follow before they engage in certain activity so as to ensure that such activity will not create a conflict of interest;
- c) the duty of the director to disclose any matter that may result, or has already resulted in a conflict of interest;
- d) the responsibility of the director to abstain from voting as prescribed and on any matter where the director may have conflict of interest;
- e) adequate procedures for transactions with related parties to be made on a non-preferential basis; and the way in which the Board will deal with any non-compliance with the policy.

The Conflict of Interest Policy was approved by the Board of Directors on 28th November 2018. The Board shall maintain an up-to-date register for documenting and managing conflict of interest situations in the Company.

Group Structures

The Board of financial holding company shall have the ultimate responsibility for the adequate corporate governance across the group. The Board shall ensure that there are governance policies and mechanisms appropriate to the structure, business and risk of the group and its entities. The Board of Directors in addition to the Bank of Ghana Corporate Governance Directive of December 2018 utilizes the SG Group Corporate Governance Principles Instruction 01422 VI EN applicable to Group entities as at 2018.

Senior Management Duties

Under the direction of the Board, Senior Management ensures:-

- that the activities of the Bank Institution is consistent with the business strategy, risk tolerance/appetite and policies are approved by the Board.
- establish a management structure that promotes accountability and transparency; and
- Implement appropriate systems for managing risks both financial and non-financial - to which the Bank is exposed.
- Engage skilled and competent staff and provide training and development opportunities to sustain the delivery of short and long –term business objectives, the risk management framework and protect the reputation of the Bank.

Risk Management and Internal Controls

The Board ensures that the Bank has effective internal controls systems and a risk management function including an Acting Chief Risk Officer with sufficient authority, stature, independence, resources and access to the Board.

Risk Management Function

The Board has in place a risk management function which is responsible for: identifying key risks to the Bank assessing those risks and the Bank's exposure to the identified risks; monitoring the risk exposures and determining the corresponding capital needs on an on-going basis; monitoring and assessing decisions to accept particular risks, risk mitigation measures and if the risk decisions are in line with the Board approved risk tolerance/appetite and risk policy; and submitting risk management reports to Senior Management and the Board.

Chief Risk Officer

The bank has an Acting Chief Risk Officer who is an independent Key Management Personnel and who has no involvement in the operations of the bank with distinct responsibility for the risk management function and the comprehensive risk management framework of the bank across the entire organization. The independence of the Acting Chief Risk Officer is distinct from other executive functions and business line responsibilities. The Acting Chief Risk Officer reports to the Board via the Risk Committee with a functional report line to the Managing Director. He has unfettered reporting access to Board and its risk committee. Interaction between the Board Risk Committee and the Chief Risk Officer is regular and comprehensively documented.

Internal Controls

Internal controls within the Bank are designed to ensure that each key risk has a policy, process or other measure, as well as a control to ensure that such policy, process or other measure is being applied and works as intended. Internal controls help provide comfort that financial and management information is reliable, timely and complete and that the Bank is in compliance with its various obligations, including applicable laws and regulations.

Head Internal Auditor

The Bank has a Head Internal Auditor who is an independent Key Management Personnel who has no involvement in the audited activities and business line responsibilities of the Bank. The Head Internal Auditor is competent to examine all areas in which the Bank operates and:

- Has the professional competence to collect and analyze financial information as well as evaluate audit evidence and to communicate with the stakeholders of the internal audit function; possess sufficient knowledge of auditing techniques and methodologies;
- Is a member of the relevant recognized professional body;

The Head of Internal Audit reports to the Board sub-committee on audit and has direct access to the Board and its audit committee. Interaction between the Board Audit Committee and the Internal Audit is regular and comprehensively documented

Group-wide and Bank-wide Risk Management

Risks in the Bank are identified and monitored on an on-going group-wide and bank-wide basis, and the sophistication of the risk management and internal control infrastructure - including, in particular, a sufficiently robust information technology infrastructure keeps pace with developments.

Risk management in Subsidiary Banks

The Board and Senior Management of parent banks or financial holding companies conducts strategic, group-wide risk management and prescribe group risk policies. The Board and Senior Management of Bank have appropriate input into the group-wide risk management policies and assessments of local risks. Adequate stress-testing of the subsidiary portfolios is done based on both the economic and operating environment of the subsidiary and on potential stress of the parent bank or Financial Holding Company. The results of stress tests and other risk management reports shall be communicated to the Board and Senior Management.

Internal and External Audit Functions

The Board and Senior Management effectively utilize the work conducted by the internal audit functions, external auditors and internal control functions. The Board recognizes and acknowledges that independent, competent and qualified internal and external auditors, as well as other internal control functions, are vital to the corporate governance process and engage the auditors to judge the effectiveness of the risk management function and the compliance function.

Compensation System

Where share options are adopted as part of executive remuneration or compensation, it shall be tied to performance and subject to shareholders’ approval at an annual general meeting. The Bank has disclosed in the, details of shares held by directors and related parties.

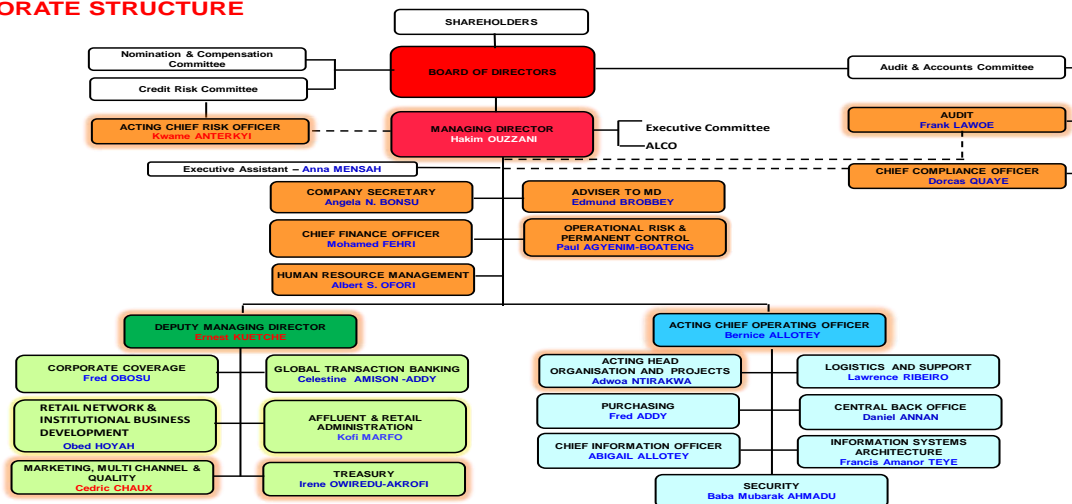

“Know Your Structure”

The Board and Senior Management understand the structure and the organization of the group and the Bank
 The Board actively oversees the design and operation of the compensation system. The Board monitors and reviews the compensation system to ensure that it is effectively aligned with prudent risk taking; Levels of remuneration are sufficient to attract, retain and motivate executive officers of the bank and this is balanced against the interest of the bank in not paying excessive remuneration; Where remuneration is tied to performance, it shall be designed in such a way as to prevent excessive risk taking;
 The Board is working on achieving convergence for a Committee of Independent Directors to determine the remuneration of executive directors. Executive directors are not entitled to sitting allowances and directors’ fees; Non-executive directors’ remuneration are be limited to directors’ fees, sitting allowances for Board and Committee meetings and are not performance related.

Disclosure and Transparency

The bank has submitted a list of its significant shareholders, directors and Key Management personnel as at 31st of December to the Bank of Ghana by 15th January of the following year. Below is the Corporate Structure of the Bank.

CORPORATE STRUCTURE

Ethics and Professionalism

The Bank has in place a Code of Conduct which was duly approved by the Board on 28th November 2018. The Code of Conduct has been made available to the Board of Directors and all Employees. The Code shall be reviewed regularly and when necessary. It contains practices necessary to maintain confidence in the integrity of the Bank and commit the Bank, its staff, management and the Board to the highest standards of professional behaviour, business conduct and sustainable banking practices. It has been approved by the Board and signed off by employees that they understand the code and sanctions for breaching the policy.

Cooling-off Period

The Bank will respect the Cooling Off period under the Corporate Governance Directive which stipulates that former Bank of Ghana officers, directors or senior executives shall not be eligible for appointment as a director of the Bank until after a period of two (2) years following the expiration or termination of their contract of employment or service from the Bank of Ghana. A practicing audit professional or partner who is rendering services or had rendered auditing services in the banking industry shall not be appointed as a director of the bank until one (1) year has elapsed since last engagement with any Bank by that person.

A Code of Ethics for all company employees

Societe Generale Ghana has a Code of Ethics for staff and this has been made available to all employees of the Bank.

Code of Ethics for the Board and waivers to the ethics code

The Regulations of the Bank provides for ethics for the Board and provides that the Directors stand in a fiduciary relationship towards the Company in any transaction with it or on its behalf. A Director shall at all times in what he believes to be the best interests of the Company as a whole so as to preserve its assets, further its business, and promote the purposes for which it was formed, and in such manner as a faithful, diligent, careful and ordinarily skilful Director would act in the circumstances. In considering whether a particular transaction or course of action is in the best interests of the Company as a whole, a Director may have regard to the interests of the employees, as well as the members, of the Company, and, when appointed by, or as representative of, a special class of members, employees, or creditors may give special, but not exclusive, consideration to the interests of that class.

Performance evaluation process

The Board has in place an evaluation process which covers the functions of the Board; Board meetings management and procedures; Appointment, Induction, Training and Development; Succession and Removal; Board Structure; Information and Communication. An evaluation was undertaken during the Reporting Period.

Role and functions of the board of directors and committees of the board

The main task of the Board of Directors is to make sure that the Bank's operations comply with the relevant applicable regulations and with the strategy defined. In this capacity, it must:

Define and follow up the implementation of the Bank's strategic orientations while making sure its business is developing in the proper conditions of security,

Check and approve management (business activities, results, human and technical resources, investments, etc.) by relying on the work of the reporting committees from which it regularly receives information and to which it may assign tasks where necessary

Appoint, according to applicable local rules, the Bank's Representatives who shall manage the Bank,

Make sure the information given to the banking and market authorities and to shareholders is reliable. Therefore, it draws up the financial statements then presents them to the shareholders' meeting for approval.

It must assess the way it operates annually. There are three reporting Committees responsible for supporting the Board of Directors which are The Credit Risk Committee; The Audit and Accounts Committee; and the Nomination and Compensation Committee.

Societe Generale Ghana Limited
Report of the Directors - continued

Independence of the board of directors

The Bank is committed to achieving the highest standards of corporate governance, corporate responsibility and risk management when conducting its business. The Bank ensures that it conducts its business activities in accordance with all laws and regulations which govern its business activities. The Board of Directors are responsible for ensuring that Societe Generale Ghana achieves and maintains a high standard of corporate governance and practices.

The Bank has an eight member Board comprising one executive director and seven non-executive directors. The Board consists of highly qualified individuals with diverse professional experiences: The core role of the Board is to promote the success of the Bank by providing direction and supervision in the Bank's affairs. Among other roles, the Board:

- provides leadership to the Bank within a framework of prudent and effective controls which enable risks to be assessed and managed;
- provides input into the development of the long-term objectives and overall commercial strategy for the Bank and is responsible for the oversight of the Bank's operations while evaluating and directing the implementation of the Bank's controls and procedures;
- provides oversight of the Bank's strategic aims, ensuring that the necessary financial and human resources are in place for the Bank to meet its objectives, as well as reviewing management performance;
- upholds the Bank's values and standards and ensures that its obligations to its shareholders and other stakeholders are understood and met; and
- ensures timely and accurate financial reporting to shareholders

Determination and composition of directors' remuneration

Section 194(1) of the Companies Code 1963 (Act 179) as amended by the Companies (Amendment) Act 2012 Act 835 provides that the fees and other remuneration payable to the Directors in whatsoever capacity shall be determined from time to time by ordinary resolution of the company and not by any provisions in the Regulations or in any agreement which provision shall be null and void. Section 78(3) of the Regulations of the Bank provides that fees payable to Directors shall not be increased except pursuant to an ordinary resolution passed at a General Meeting, where notice of the proposed increase has been given in the Notice convening the meeting. Collectively, the Directors at the Board meeting preceding the Annual General Meeting agree their fees and this then placed before the Shareholders of the Bank through an ordinary resolution at the Annual General Meeting.

Checks and balances mechanisms balancing the power of the CEO with the power of the board

Section 87 of the Regulations of the Bank provide that the Board of Directors may from time to time appoint one of their body to the office of Managing Director, who shall be the Chief Executive, for such period and on such terms as may be determined and, subject to the terms of any agreement entered into in any particular case, may revoke such appointment and such appointment shall be automatically determined if the holder of the office ceases from any cause to be a Director.

Subject to any directives of the Board on matters of general policy the Managing Director shall be responsible for the directions of the day-to-day business of the Bank and for its administration. If the Managing Director is absent from Ghana or is otherwise incapacitated from performing duties of the office, the Board may authorise an employee of the Bank to exercise, for the time being, all the duties and powers of the Managing Director.

Societe Generale Ghana Limited
Report of the Directors - continued

The Directors may entrust to and confer upon a Managing Director any of the powers exercisable by them upon such terms and with such restrictions as they think fit, and either collaterally with, or to the exclusion of, their own powers and, subject to the terms of any agreement entered into in any particular case, may from time to time revoke or vary all or any of such powers.

Process for appointment of external auditors

Section 81 of the Banks and Specialized Deposit Taking Institutions Act, 2016 Act 930 vests the shareholders of a bank with the power to point the external auditors at an Annual General Meeting and be approved by the Bank of Ghana in the manner and on the terms as may be described.

Process for interaction with external auditors

The Board of Directors on an annual basis invite the external auditors of the company to a meeting for an Independent Auditors Report on the Audited Financial Statements of the Company. At the meeting, a Management letter of the company is submitted to the Directors of the Company. The external auditors of the company explain to the Board the completion of the audit on the company which is undertaken in accordance with international standards. They usually state that the audit is conducted to enable the external auditors form an opinion on the financial statements that have been prepared management with oversight of the Board of Directors. They further explain to the Board that the audit of the financial statements does not relieve management or the Board of their responsibilities. The auditors draw the Board's attention to any matters identified during the audit of the financial statements of the company. The auditors obtain Management's Responses to any matter(s) and draw the Board's attention to any areas of concern. At the meeting the External Auditors report on the Financial Statements, the Directors Responsibility for the Financial Statement, the Auditors Responsibility, Opinion and Report on other legal and regulatory requirements.

Duration of current auditors

Messrs.' Ernst & Young were appointed as Auditors of Societe Generale Ghana Limited on 31 March 2017 during the Bank's Annual General Meeting. Thus, they are in their third year of providing auditing services to the bank. This is in accordance with Section 134(5) of the Companies Code 1963 (Act 179) as amended by the Companies (Amendment) Act 2012, Act 835 and Section 54(2) (d) of the Regulations of the Bank.

Auditors' involvement in non-audit work and the fees paid to the auditors

Apart from the audit assignment, Ernst and Young were engaged to undertake one non-audit work during the year under review. They were contracted to provide a Letter of Certification of Our Indebtedness in relation to the rights issue process as required by the Securities and Exchange Commission Regulations (2003).

Auditors Remuneration

In accordance with Section 134(5) of the Companies Code 1963 (Act 173) as amended by the Companies (Amendment) Act 2012 (Act 835). Messrs.' Ernst & Young the Company's auditors have agreed to continue in office as the Bank's auditors. A Resolution to authorize the Directors to determine their remuneration for the year ended 31 December 2018 will be proposed at the Annual General Meeting.

Stated Capital of the Bank

The stated capital of the Bank is GHS404,245,427.

Substantial Shareholders

Details of the Bank's twenty largest shareholders are disclosed in note (44) to the financial statements.

Corporate Governance

Societe Generale Ghana Limited respects the standards of good corporate governance, which include transparency, accountability and rights of all its stakeholders.

Risk Committee

In line with its Corporate Governance principles, the Board of Directors has a Risk Committee made up of the following directors:

Michel Miaille	-	Chairman
Hakim Ouzanni	-	Member
Sionle Yeo	-	Member

The Risk Committee

- Analyses on a periodical basis the organisation and functioning of the Bank's risks departments.
- Reviews the portfolio of credit and market risks to which the Bank is exposed.
- As regards counterparty risks, the Risk Committee shall review the following:
 - the content of and changes to the portfolio per type of facility and debtor,
 - The regulatory ratios and key indicators (consumption of own funds by major risks, risk worsening ratios, concentration risk per sector, cost of the risk, etc.),
 - changes to the quality of commitments: sensitive, irregular, non-performing files,
 - Compliance with the conditional authorizations issued by the Société Générale, etc.
 - adequacy of the level of provision for the risks incurred,
 - the efficiency of debt collection,
- Reports to the Board of Directors on its work.

The Committee reports its findings to the Board of Directors with the requisite recommendations. In attendance at Risk Committee meetings are the Managing Director, Deputy Managing Director, Chief Operating Officer, Acting Chief Risk Officer; Chief Compliance Officer; Head of Audit Department; Chief Finance Officer; General Manager Corporate Coverage. The Risk Committee operates under a Charter.

Audit and Accounts Committee

In line with its Corporate Governance principles, the Board of Directors has an Audit and Accounts Committee made up of the following directors:

Mr. Joseph Torku	-	Chairman
Michel Miaille	-	Member
Kofi Ampim	-	Member
Teresa Ntim	-	Member
Mrs Laurette Otchere	-	Member

This Committee reviews and makes recommendations to the Board on all aspects of the audit and financial reporting processes. In attendance at Audit and Accounts Committee meetings are the Managing Director, Deputy Managing Director, Chief Operating Officer, Head of Audit Department, Head of Permanent Control Department and where necessary, the Bank's External Auditors. The audit committee operates under a charter.

The Audit and Accounts Committee :

- Keeps up-to-date with changes in the legal and regulatory environment affecting the work the committee monitors for proper execution
- Reviewing and validating the accounts of the bank and the work of the External Auditors
- Periodically gives an opinion of the organisation and functioning of the Bank's periodic and permanent internal control. Suggests to the Board of Directors the relevant adaptations, monitors the implementation of these measures and reports on their application to the Board of Directors
- Validates, in consultation with the Groups relevant Departments the Audit Plan of the Bank while making sure that the development method enables the areas of risk to be properly detected and covered.
- Follows up the implementation of the Audit Plan and proposes adjustments if necessary.
- Reviews the work done by Periodic and Permanent Control:
 - reports to the Board of Directors on any anomalies and gives its opinion of the relevance of the corrective measures chosen by the Bank's Management,
 - monitors the implementation, according to the deadlines set, of the critical periodic control recommendations as well as the solving of the critical points identified,
- Informs the Board of Directors of any discrepancies in the critical and priority corrective measures (failures exposing the entity to a high risk).
- Reviews the procedures and the functioning of the anti-money laundering and terrorism financing systems, and the compliance risk control.
- Submits to the Board of Directors the measures likely to improve, where applicable, the security of operations, and monitors the implementation of the selected measures
- Is generally informed by Management of any event occurring in the operation of the Bank which is likely to adversely affect its control of risks.

The list of issues to be addressed at the Audit and Accounts Committee meetings are formalised in the Audit and Accounts Committee File; Audit and Accounts Committee Appendix; Permanent Control activity; Internal Audit Report to the Audit and Accounts Committee and discussed according to the Agenda.

Nomination and Compensation Committee

In line with its Corporate Governance principles the Board of Directors has a Nomination and Compensation Committee made up of the following

Teresa Ntim	-	Chairperson
Laurette K Otchere	-	Member
Kofi Ampim	-	Member
Mr Joseph Torku	-	Member
Michel Miaille	-	Member
Hakim Ouzzani	-	Member
Sionle Yeo	-	Member

This Committee ensures the bank has a board of competent and effective composition and is adequately charged to carry out its responsibility in the best interest of the bank and its shareholders.

The following are the elements that may come under its scope and authority:-

- The Bank's general wage policy
- The detailed salaries of the Bank's senior executives and Key management Personnel
- Changes in social liabilities
- Administrators and Company Managers pay.

The Nomination & Compensation Committee does not however have authority to make decisions on these issues and has a purely advisory capacity; therefore it may only formulate opinions and recommendations to the Board of Directors.

Compliance with Securities and Exchange Commission Regulations

The Bank has complied with the regulations of the Securities and Exchange Commission (L.I. 1728 Regulation 61) and has submitted to the Commission as requested, two (2) reports of the Audit and Accounts Committee for the year 2016. The Audit Committee held three meetings during the year under review. In fulfilment of the Securities and Exchange Commission requirements, we present a summary of the reports so submitted:

- Report on the Credit Risk, Operational Risk, and Market Risk Activities
- Report on Structural Risks and Statutory Ratios
- Report on Bank of Ghana's Prudential Ratios
- Report on an overview of the Audit Division and its functions
- Report on Compliance Monitoring, Anti Money Laundering and Permanent Supervision ensuring continuous monitoring of operational activities.
- Report on Counterparty Risks
- Report on Changes in Organisational Structure
- Report on Business Continuity Plan
- Audit Reports on Branches submitted.
- Report on Managing Conflict of Interest within the Bank

The External Auditors submitted their audit plan for the year and concluded that the audit approach will be risk based and control focused and that the audit will be in accordance with International Standards on Auditing.

Societe Generale Ghana Limited
Statement of Directors' Responsibilities

The directors are responsible for preparing financial statements for each financial period which give a true and fair view of the state of affairs of the bank at the end of the period and of the profit or loss of the bank for that period. In preparing those financial statements, the directors are required to:

- Select suitable accounting policies and then apply them consistently.
- Make judgments and estimates that are reasonable and prudent.
- State whether applicable accounting standards have been followed, subject to any material departures, disclosed and explained in the financial statements.
- Prepare the financial statements on a going concern basis unless it is inappropriate to presume that the company will continue in business.

The Directors are responsible for ensuring that the company keeps accounting records which disclose with reasonable accuracy the financial position of the company and which enable them to ensure that the financial statements comply with the Companies Code 1963 (Act 179) as amended by the Companies (Amendment) Act 2012 (Act 835) and the Banks and Specialized Deposit Taking Institutions Act, 2016 Act 930 and International Financial Reporting Standards. They are responsible for safeguarding the assets of the bank and hence for taking steps for the prevention and detection of fraud and other irregularities.

The above statement should be read in conjunction with the statement of the auditors' responsibilities on page **XXX**, which is made with a view to distinguishing, for shareholders, the respective responsibilities of the Directors and the Auditors in relation to the financial statements.

Societe Generale Ghana Limited

**INDEPENDENT AUDITOR'S REPORT
TO THE SHAREHOLDERS OF SOCIETE**

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Societe Generale Ghana Limited (the Bank) set out on pages 24 to 82, which comprise the statement of financial position as at 31 December 2018, the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Bank as at 31 December 2018, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and in the manner required by the Companies Act, 1963 (Act 179) and the Banks and Specialized Deposit Taking Institutions Act, 2016 Act 930.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the financial statements section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and other independence requirements applicable to performing audits of Societe Generale Ghana Limited. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code, and in accordance with other ethical requirements applicable to performing the audit of Societe Generale Ghana Limited. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

Key Audit Matter	How the matter was addressed in the audit
<p>Impairment of loans and advances in line with IFRS 9 Financial Instruments and related disclosure</p> <p>IFRS 9 introduced a forward-looking Expected Credit Loss (ECL) model. The ECL model is to reflect the general pattern of deterioration or improvement in the credit quality of financial instruments. The amount of ECL's recognized as a loss allowance or provision depends on the extent of credit deterioration since initial recognition and recognition of impairment could be done on a 12-month expected credit losses or Lifetime expected credit losses. Impairment computations under IFRS 9 therefore involves the use of models that take into account:</p> <ul style="list-style-type: none"> • The probability-weighted outcome • Reasonable and supportable information that is available without undue cost or Loan loss provision is a key area of judgement for management. Significant judgements in the determination of the Bank's Expected Credit Loss includes: • Use of assumptions in determining ECL modelling parameters • portfolio segmentation for ECL computation • Determination of a significant increase credit risk and • Determination of associations between macroeconomic scenarios <p>The use of different modelling techniques could produce significantly different estimates of loan loss provisions. Due to the complexity of the requirements of IFRS 9 with regards to the classification and measurement, it's impact on the financial position as at 1 January 2018 and the significance of related disclosures, we considered it as key audit risk and therefore paid attention to it's processes, data gathering and effect on related disclosures.</p> <p>A total amount of GHS 36,980,301 has been recognized as a day one impact (as at 1 January 2018) and a total amount of GHS 57,889,364 has been recorded in the statement of profit or loss and other comprehensive income for the year as credit loss. The total impairment provision held as at 31 December 2018 in accordance with IFRS 9 impairment rules was GHS 249,360,503.</p> <p>Further disclosures relating to these amounts and the Bank's accounting policies regarding estimating these ECLs have been disclosed in note 2.16c and note 19 of these financial statements.</p>	<p>We have obtained an understanding of the Bank's implementation process of IFRS 9, including understanding of the changes to the Bank's IT systems, processes and controls. Additionally, we obtained an understanding of the credit risk modelling methodology. We validated and tested the ECL model of the Bank by assessing the data integrity and the internal controls around the model. We have also performed, among others, the following substantive audit procedures:</p> <ul style="list-style-type: none"> • reviewed the accounting policies and framework methodology developed by the Bank in order to assess its compliance with IFRS 9; • verified sampled underlying contracts of financial assets to determine the appropriateness of management's classification and measurement of these instruments in the ECL model • reviewed and tested the methodology developed to calculate loan loss provision under IFRS 9, concentrating on aspects such as factors for determining a 'significant increase in credit risk', staging of loans, testing specific models related to Probability of Default (PD), Loss Given Default (LGD), Exposure at Default (EAD) • Testing the completeness of data used in modelling the risk parameter, o Recalculating the ECL , • testing forward looking information / multiple economic scenario elements • for stage 3 exposures, we tested the assumptions underlying the impairment identification and quantification including forecasts of future cash flows, valuation of underlying collateral, estimated period of realisation for collaterals, etc <p>Reviewed the Pre-transition disclosures and disclosures at year end, included in the financial statements to ensure clarity and comprehensive disclosure of the Expected Credit Loss and IFRS 9 transition.</p>
<p>Adequacy of regulatory credit risk provisioning</p> <p>Aside application of IFRS impairment rules, Bank of Ghana has specific rules governing regulatory provisions as disclosed in note 19d of the financial statements. Unlike IFRS impairment rules however, regulatory provision rules are more deterministic and triggered mainly by the number of days a facility has been in default.</p> <p>The excess of regulatory provision over IFRS provision is recognised directly in equity as Credit risk reserves. Regulatory credit risk provisions represent a key risk area for the Bank as misstatements in the carrying amount of this balance could have significant impact on the Bank's financial statements including the accuracy of its capital adequacy computations and other key industry performance indicators.</p>	<p>We assessed the systems and related controls instituted by management to ensure the accurate determination of these provisions.</p> <p>We reviewed the process for aging and categorisation of the various loan buckets and the application of related regulatory provision rates.</p> <p>We tested a sample of these provisions based on our overall risk assessment of this account.</p>

Societe Generale Ghana Limited
INDEPENDENT AUDITOR'S REPORT Cont.

Other Information

The directors are responsible for the other information. The other information comprises corporate information (Directors, Officials and Registered Office), report of the Directors and statement of directors' responsibilities. Other information does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the financial statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act, 1963 (Act 179) and the Banks and Specialized Deposit Taking Institutions Act, 2016 Act 930, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Bank or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting processes.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the bank to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the Bank's audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal controls that we identify during our audit.

Societe Generale Ghana Limited
INDEPENDENT AUDITOR'S REPORT Cont.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal requirements

The Companies Act, 1963 (Act 179) requires that in carrying out our audit we consider and report on the following matters. We confirm that:

- We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
- In our opinion proper books of account have been kept by the Bank, so far as appears from our examination of those books;
- Proper returns adequate for the purpose of our audit have been received from branches not visited by us; and
- The balance sheet (statement of financial position) and the profit or loss account (profit or loss section of the statement of profit or loss and other comprehensive income) are in agreement with the books of account.

The Banks and Specialized Deposit Taking Institutions Act, 2016 Act 930 under section 85(2) requires that we report on certain matters. Accordingly, we state that;

- The accounts give a true and fair view of the statement of affairs of the bank and the results of operations for the year under review;
- We were able to obtain all the information and explanation required for the efficient performance of our duties;
- The transactions of the bank are generally within the powers of the bank;
- The bank has generally complied with the provisions of the Anti-Money Laundering Act, 2008 (Act 749), the Anti-Terrorism Act, 2008 (Act 762) and regulations made under these enactments;
- The bank has generally complied with the provisions of the Banks and Specialized Deposit Taking Institutions Act, 2016 Act 930.

Societe Generale Ghana Limited

Notes to the Financial Statements For the year ended 31 December 2018

1. Reporting Entity

Societe Generale Ghana Limited (the Bank) is a limited liability company incorporated in Ghana under the Companies Code, 1963 (Act 179). The Bank is domiciled in Ghana with its registered office at 2nd Crescent, Royalt Castle Road, Ring Road Central, Accra. The Bank is authorized and licensed to carry out the business of banking and provides retail banking, corporate banking, investment banking and other financial intermediation activities and specialized financing activities such as leasing and consumer credits through its network of branches and outlets including divisions across Ghana.

The principal activities of the Bank are described in the Directors' Report. Societe Generale (Group), a bank incorporated in France, is the ultimate parent of the Bank.

The Bank is listed on the Ghana Stock Exchange (GSE). This has enabled the equity shares of the Bank to be traded publicly on the GSE.

1 Authorization for publication

The financial statements of the Bank for the year ended 31 December 2018 were authorized for issue in accordance with a resolution of the board of directors on 4th March 2019.

2. Basis of preparation

2 Statement of compliance

These financial statements of the Bank have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and accounting requirement as dictated by the guide for financial publication 2017 issued by the Bank of Ghana. Except as otherwise specified by the guide for financial publication 2018, the financial statements are to be prepared in accordance with IFRS.

2 Basis of measurement

The financial statements have been prepared on the historical cost basis except for the following material items that are measured at fair value in the Statement of Financial Position:

- Financial assets and liabilities held-for-trading
- Derivative financial instruments
- Available-for-sale investment securities
- Equity investment

2 Functional and presentation currency

The financial statements are presented in Ghana Cedis [GH¢], which is the functional and presentational currency of the Bank.

2 Presentation of Financial Statements

The Bank presents its statement of financial position in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date and more than 12 months after the date is presented in note 37.

3 Accounting policies

The bank has not restated comparative information for 2017 for financial instruments in the scope of IFRS 9. Therefore, the comparative information for 2017 reported under IAS 39 and is not comparable to the information presented in 2018. Differences arising from the adoption of IFRS 9 have been recognise directly in income surplus as at 1 January 2018 and are disclose in Note 5.

3 Foreign currency transactions

Transactions denominated in foreign currencies are recorded in the functional currency using the exchange rates prevailing at the date of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rate of exchange ruling at the reporting date.

Foreign exchange gains and losses resulting from the settlement of foreign currency transactions are recognized in profit or loss under the heading "trading revenue". Foreign exchange gains and losses resulting from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in profit or loss under the heading "other operating income".

The effect of exchange rate changes on cash and cash equivalents held or due in a foreign currency is reported in the statement of cash flow as part of the reconciliation of cash and cash equivalents at the beginning and end of the period. This amount is presented separately from cash flows from operating, investing and financing activities and includes the differences, if any, had those cash flows been reported at end of period exchange rates.

2.7 Segmental reporting

IFRS 8 requires the identification of operating segments to be on the basis of internal reports that are reviewed by an entity's Chief Operating Decision Maker (CODM) to allocate resources to the segment and assess its performance.

Societe Generale Ghana Limited is managed on a basis that takes account of the different business lines that dominate the operating activities of the Bank. Major business lines of the Bank are:

- a. Retail banking
- b. Corporate banking
- c. Treasury

The banking activities of the Bank have been segmented into various business lines. The profitability of these business lines is assessed based on the profit and loss statement produced. These are illustrated in Note 39.

3 Property, plant and equipment

The Bank recognizes an item of property, plant and equipment as an asset when it is probable that future economic benefits will flow to it and the cost of the item can be measured reliably.

Land and buildings held for use in the provision of services, or for administrative purposes, are stated in the statement of financial position at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Valuations are performed with sufficient frequency to ensure that the carrying amount of a revalued asset does not differ materially from its fair value.

Any revaluation increase arising on the revaluation of such land and buildings is recognised in other comprehensive income and accumulated in equity, except to the extent that it reverses a revaluation decrease for the same asset previously recognised in profit or loss, in which case the increase is credited to profit or loss to the extent of the decrease previously expensed. A decrease in the carrying amount arising on the revaluation of such land and buildings is recognised in profit or loss to the extent that it exceeds the balance, if any, held in the properties revaluation reserve relating to a previous revaluation of that asset.

3 Property, plant and equipment - continued

Properties in the course of construction for provision of services or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the bank's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Depreciation on revalued buildings is recognised in profit or loss. On the subsequent sale or retirement of a revalued property, the attributable revaluation surplus remaining in the properties revaluation reserve is transferred directly to retained earnings.

Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

The current annual depreciation rates for each class of property, plant and equipment are as follows:

Buildings	3.00%
Furniture and equipment	20.00%
Computer	33.33%
Household furniture	25.00%
Motor vehicles	33.33%
Leasehold land amortized over leased period	
Freehold land not depreciated	

Costs associated with routine servicing and maintenance of assets are expensed as incurred. Subsequent expenditure is only capitalized if it is probable that future economic benefits associated with the item will flow to the Bank.

The carrying values of property and equipment are reviewed for indications of impairment annually, or when events or changes in circumstances indicate the carrying value may not be recoverable. If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets or cash-generating units are written down to their recoverable amount.

3 Property, plant and equipment - continued

The recoverable amount of property and equipment is the greater of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognizing of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in profit or loss in the year the item is derecognized.

Residual values, useful lives and methods of depreciation for property and equipment are reviewed, and adjusted if appropriate, at each reporting date.

3 Intangible assets: Computer software

Costs incurred to acquire and bring to use specific computer software licenses are capitalized. Following initial recognition, intangible assets are carried at cost less accumulated amortization and any impairment losses. The amortization period and method for an intangible asset, in this case computer software, are reviewed at least at each reporting date. Changes in the expected useful life in the asset are accounted for by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates. The amortization expense on the intangible assets is recognized in profit or loss in the expense category consistent with the function of the intangible asset. Amortisation is calculated using the straight line method on the basis of the expected useful lives of the assets which range between 4 and 5 years.

The carrying values of intangible assets are reviewed for indications of impairment annually or when events or changes in circumstances indicate the carrying value may not be recoverable.

If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets or cash-generating units are written down to their recoverable amount.

The recoverable amount of intangible assets is the greater of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Gains or losses arising from de- recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in profit or loss when the asset is derecognized.

Provisions

The Bank recognizes provisions when it has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Bank expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain.

The expense relating to any provision is presented in profit or loss net of any reimbursement.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

Notes to the Financial Statements

For the year ended 31 December 2018 - continued

2 Employee benefits

The Bank contributes to a three-tier defined contribution schemes on behalf of employees. The tier one and two are mandatory. The Bank contributions 10% towards the voluntary tier three plan.

2.12 Revenue

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Bank and the revenue can be reliably measured. The following specific recognition criteria are met before revenue is recognized:

a Interest income

Under both IFRS 9 and IAS 39, interest income is recorded using the effective interest rate (EIR) method for all financial instruments measured at amortised cost, financial instruments designated at FVPL. Interest income on interest bearing financial assets measured at FVOCI under IFRS 9, similarly to interest bearing financial assets classified as available-for-sale or held to maturity under IAS 39 are also recorded by using the EIR method. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset. The EIR (and therefore, the amortised cost of the asset) is calculated by taking into account any discount or premium on acquisition, fees and costs that are an integral part of the EIR. The Bank recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, it recognises the effect of potentially different interest rates charged at various stages, and other characteristics of the product life cycle (including prepayments, penalty interest and charges).

If expectations regarding the cash flows on the financial asset are revised for reasons other than credit risk. The adjustment is booked as a positive or negative adjustment to the carrying amount of the asset in the balance sheet with an increase or reduction in interest income. The adjustment is subsequently amortised through Interest and similar income in the income statement.

The Bank calculates interest income by applying the EIR to the gross carrying amount of financial assets other than credit-impaired assets.

When a financial asset becomes credit-impaired and is, therefore, regarded as 'Stage 3', the Bank calculates interest income by applying the effective interest rate to the net amortised cost of the financial asset. If the financial assets cures and is no longer credit-impaired, the Bank reverts to calculating interest income on a gross basis

For purchased or originated credit-impaired (POCI) financial assets the Bank calculates interest income by calculating the credit-adjusted EIR and applying that rate to the amortised cost of the asset. The credit-adjusted EIR is the interest rate that, at original recognition, discounts the estimated future cash flows (including credit losses) to the amortised cost of the POCI assets.

Interest income on all trading assets and financial assets mandatorily required to be measured at FVPL is recognised using the contractual interest rate in net trading income and Net gains/(losses) on financial assets at fair value through profit or loss, respectively.

b Commissions and fees

Commission and fees revenues and expenses that are integral part of financial instruments and are included in the measurement of the effective interest rate are spread over the period of the financial instruments. Commission and fees in respect of services are recognized in the profit or loss statement when the related services are performed.

The Bank earns commission and fees from a diverse range of services provided to its customers. Fee revenue is accounted as follows:

- Revenue is earned on execution of discrete act (such as funds transfers, special clearing and fees arising from negotiating transactions with third parties) is recognized as revenue when the act is completed.
- Income earned from the provision of services (such as request for special statements, safe custody, COTs and advisory services) is recognized as revenue as the services are provided.
- Fees which forms an integral part of the effective interest rate of a financial instrument (such as commitment and processing fees on corporate loans) is recognized as an adjustment to the effective interest rate.

c Other operating income

This is made up of other operating income including bad debts recovered, dividend, profit or loss on sale of property, plant and equipment, other miscellaneous incomes and exchange gains.

2.13 Interest expense

Interest expense is recognized in profit or loss for all interest-bearing financial instruments measured at amortized cost, including loans and advances, as interest accrues using the effective interest rate method.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating the interest expense.

The effective interest rate is the rate that exactly discounts the estimated future cash payments over the expected life of the instrument or, when appropriate, a shorter period, to the net carrying amount of the financial liability.

The effective interest rate is calculated on initial recognition of the financial liability, estimating the future cash flows after considering all the contractual terms of the instrument. The calculation includes fees paid by the Bank that are an integral part of the the acquisition, issue or disposal of a financial instrument .

2.14 Taxation

Income tax charged to the profit or loss account for the year comprises current tax and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in shareholders' equity or other comprehensive income, in which case it is recognized in shareholders' equity or other comprehensive income.

a Current income tax

Current tax is the tax expected to be payable under the Income Tax Act, 2015 (Act 896) on the taxable profit for the year, calculated using the tax rates enacted or substantially enacted by the reporting date, and any adjustment to tax payable in respect of previous years. Current tax assets and liabilities are offset when the Bank intends to settle on net basis and the legal right to set off exists.

Current income tax relating to items recognized directly in equity or other comprehensive income is recognized in equity or other comprehensive income and not in profit or loss.

b Deferred income tax

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

Deferred tax is calculated using the rate expected to apply in the period in which the assets will be realized or the liabilities settled. Deferred tax assets and liabilities are offset when they arise in the same tax reporting entities and relate to income taxes levied by the same taxation authority, and when a legal right to set off exists in the entity.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized.

Deferred tax relating to items recognized directly in equity or other comprehensive income is recognized in equity or other comprehensive income and not in profit or loss.

c Value Added Tax -VAT

Revenues, expenses and assets are recognized net of the amount of VAT except:

- Where the value added tax incurred on a purchase of goods and services is not recoverable from the taxation authority, the value added tax is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- The net amount of value added tax recoverable from, or payable to, the Ghana Revenue Authority is included as part of receivables or payables in the statement of financial position.

2.15 National stabilization levy

Under the National Fiscal Stabilization Levy Act, 2013 of Ghana, financial institutions and some large firms were required to pay a levy of 5% of their profit before tax towards fiscal stabilization with effect from July 2013. The Bank has complied with this statutory obligation.

2.16 Classification & Measurement of Financial Assets and liabilities

Recognition and initial measurement

The Bank on the date of origination or purchase recognizes loans, debt and equity securities, deposits and subordinated debentures at the fair value of consideration paid. Regular-way purchases and sales of financial assets are recognized on the settlement date. All other financial assets and liabilities, including derivatives, are initially recognized on the trade date at which the Bank becomes a party to the contractual provisions of the instrument.

The initial measurement of a financial asset or liability is at fair value plus transaction costs that are directly attributable to its purchase or issuance. For instruments measured at fair value through profit or loss, transaction costs are recognized immediately in profit or loss.

Financial assets include both debt and equity instruments.

Debt instruments

Debt instruments, including loans and debt securities, are classified into one of the following measurement categories:

- Amortized cost;
- Fair value through other comprehensive income (FVOCI); or
- Fair value through profit or loss (FVTPL) for trading related assets

Classification of debt instruments is determined based on:

- (i) the business model under which the asset is held; and
- (ii) the contractual cash flow characteristics of the instrument

Business model assessment

Business model assessment involves determining whether financial assets are managed in order to generate cash flows from collection of contractual cash flows, selling financial assets or both. The Bank assesses business model at a portfolio level reflective of how groups of assets are managed together to achieve a particular business objective. For the assessment of business model the Bank takes into consideration the

- how the performance of assets in a portfolio is evaluated and reported to group heads and other key decision makers within the Bank's business lines;
- the risks that affect the performance of assets held within a business model and how those risks are managed;
- whether the assets held for trading purposes i.e., assets that the Bank acquires or incurs principally for the purpose of selling or repurchasing in the near term, or holds as part of a portfolio that is managed together for short-term profit or position taking;
- how compensation is determined for the Bank's business lines' management that manages the assets; and
- the frequency and volume of sales in prior periods and expectations about future sales activity.

Cash flow characteristics assessment

The contractual cash flow characteristics assessment involves assessing the contractual features of an instrument to determine if they give rise to cash flows that are consistent with a basic lending arrangement. Contractual cash flows are consistent with a basic lending arrangement if they represent cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI).

Principal is defined as the fair value of the instrument at initial recognition. Principal may change over the life of the instruments due to repayments.

Interest is defined as consideration for the time value of money and the credit risk associated with the principal amount outstanding and for other basic lending risks and costs (liquidity risk and administrative costs), as well as a profit margin.

In performing this assessment, the Bank takes into consideration contractual features that could change the amount or timing of contractual cash flows, such that the cash flows are no longer consistent with a basic lending arrangement. If the Bank identifies any contractual features that could modify the cash flows of the instrument such that they are no longer consistent with a basic lending arrangement, the related financial asset is classified and measured at FVTPL. Non pledged trading assets and derivative assets of the bank are measured under FVTPL whilst Loans and advances are measured under amortised cost based on their cashflow characteristics and business model.

Debt instruments measured at amortized cost

Debt instruments are measured at amortized cost if they are held within a business model whose objective is to hold for collection of contractual cash flows where those cash flows represent solely payments of principal and interest. After initial measurement, debt instruments in this category are carried at amortized cost using the effective interest rate method. The effective interest rate is the rate that discounts estimated future cash payments or receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. Amortized cost is calculated taking into account any discount or premium on acquisition, transaction costs and fees that are an integral part of the effective interest rate. Investment securities are measured under amortised cost.

Impairment on debt instruments measured at amortized cost is calculated using the expected credit loss approach. Loans and debt securities measured at amortized cost are presented net of the allowance for credit losses in the statement of financial position.

Debt instruments measured at FVTPL

Under IFRS 9, debt instruments measured at FVTPL include assets held for trading purposes, assets held as part of a portfolio managed on a fair value basis and assets whose cash flows do not represent payments that are solely payments of principal and interest. These instruments are measured at fair value in the Statement of Financial Position, with transaction costs recognized immediately in the profit or loss statement as part of net income from other financial instruments carried at fair value. Realized and unrealized gains and losses are recognized as part of Non-interest income in the profit or loss statement. Non pledged trading assets and derivative assets of the bank are measured under FVTPL. These assets were also classified under FVTPL under 1AS 39.

Equity instruments

Under IFRS 9, equity instruments are measured at FVTPL, unless an election is made to designate them at FVOCI upon purchase. For equity instruments measured at FVTPL, changes in fair value are recognized as part of Non-interest income in the profit or loss statement. An election has not been made to designate any of the equity instrument at FVOCI as such all equity instruments are measured at FVTPL in the current

Under IAS 39, equity instruments are measured at cost less impairment.

Under IFRS 9, the Bank can elect to classify non-trading equity instruments at FVOCI. This election will be used for certain equity investments for strategic or longer term investment purposes. The FVOCI election is made upon initial recognition, on an instrument-by-instrument basis and once made is irrevocable. Gains and losses on these instruments including when derecognized/sold are recorded in OCI and are not subsequently reclassified to the profit or loss. Dividends received are recorded in investment revenue in the Income Statement . Any transaction costs incurred upon purchase of the security are added to the cost basis of the security and are not reclassified to the profit or loss on sale of the security. Equity instruments at FVOCI are not subject to an impairment assessment. An election has not been made to designate any of the equity instrument at FVOCI as such all equity instruments are measured at FVTPL in the current year.

Financial liabilities

The accounting for financial liabilities under IFRS 9 remains the same as it was under IAS 39- deposits and borrowings at amortised cost and derivative liabilities at fair value through profit or loss.

Under IAS 39, financial liabilities are classified as non-trading, held for trading or designated as held at fair value through profit and loss. Non-trading liabilities are recorded at amortized cost applying the effective interest method. Held for trading liabilities or liabilities designated as held at fair value through profit and loss, are accounted for as indicated above. A financial liability (trading or other) is removed from the balance sheet when it is extinguished – that is, when the obligation is discharged, cancelled or expired. The condition is met when the liability is settled by paying the creditor, or when the debtor is released from primary responsibility for the liability either by process of law or by the creditor. A gain or loss on extinguishment of a financial liability is recognised in the profit or loss statement. Any net cash flow in relation to the restructuring of financial liabilities is an adjustment to the debt's carrying amount and is amortised over the remaining life of the liability.

Impairment

Scope

The Bank applies a three-stage approach to measure allowance for credit losses, using an expected credit loss approach as required under IFRS 9, for the following categories of financial instruments that are not measured at fair value through profit or loss:

- Amortized cost financial assets;
- Debt securities classified as at FVOCI;
- Off-balance sheet loan commitments; and
- Financial guarantee contracts.

Financial assets migrate through three stages based on the change in credit risk since initial recognition.

Expected credit loss impairment model

The Bank's allowance for credit losses calculations are outputs of models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. The expected credit loss impairment model reflects the present value of all cash shortfalls related to default events either (i) over the following twelve months or (ii) over the expected life of a financial instrument depending on credit deterioration from inception. The allowance for credit losses reflects an unbiased, probability-weighted outcome which considers multiple scenarios based on reasonable and supportable forecasts.

This impairment model measures credit loss allowances using a three-stage approach based on the extent of credit deterioration since origination:

- Stage 1 – Where there has not been a significant increase in credit risk (SIR) since initial recognition of a financial instrument, an amount equal to 12 months expected credit loss is recorded. The expected credit loss is computed using a probability of default occurring over the next 12 months. For those instruments with a remaining maturity of less than 12 months, a probability of default corresponding to remaining term to maturity is used.
- Stage 2 – When a financial instrument experiences a SIR subsequent to origination but is not considered to be in default, it is included in Stage 2. This requires the computation of expected credit loss based on the probability of default over the remaining estimated life of the financial instrument.
- Stage 3 – Financial instruments that are considered to be in default are included in this stage. Similar to Stage 2, the allowance for credit losses captures the lifetime expected credit losses.

Measurement of expected credit loss

The probability of default (PD), exposure at default (EAD), and loss given default (LGD) inputs used to estimate expected credit losses are modelled based on macroeconomic variables that are most closely related with credit losses in the relevant portfolio. The bank's portfolios have been segmented to ensure that they are consistent in terms of risk characteristics and to ensure better correlation with local macroeconomic variables. This segmentation factors in all specific characteristics associated with the bank's activities.

Details of these statistical parameters/inputs are as follows:

- PD – The probability of default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the remaining estimated life, if the facility has not been previously derecognized and is still in the portfolio.
- EAD – The exposure at default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.

- LGD – The loss given default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD.

Forward-looking information

The measurement of expected credit losses for each stage and the assessment of significant increases in credit risk considers information about past events and current conditions as well as reasonable and supportable forecasts of future events and economic conditions. The estimation and application of forward-looking information requires significant judgement.

Macroeconomic factors

In its models, the Bank relies on a broad range of forward looking information as economic inputs, such as: GDP growth, inflation rates and central bank base rates. The inputs and models used for calculating expected credit losses may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays may be made as temporary adjustments using expert credit judgement.

Macroeconomic factors

The Bank determines allowance for credit losses using three probability-weighted forward-looking scenarios. The Bank considers both internal and external sources of information in order to achieve an unbiased measure of the scenarios used. The forecasts are created using internal and external models/data which are then modified to reflect future direction of relevant economic variables as well as a representative range of other possible forecast scenarios.

The most likely outcome is aligned with information used by the Bank for other purposes such as strategic planning and budgeting. The Bank has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables, credit risk and credit losses.

Assessment of significant increase in credit risk (SIR)

At each reporting date, the Bank assesses whether there has been a significant increase in credit risk for exposures since initial recognition by comparing the risk of default occurring over the remaining expected life from the reporting date and the date of initial recognition. The assessment considers borrower-specific quantitative and qualitative information without consideration of collateral, and the impact of forward-looking macroeconomic factors.

The common assessments for SIR on retail and non-retail portfolios include macroeconomic outlook, management judgement, delinquency and monitoring. Forward looking macroeconomic factors are a key component of the macroeconomic outlook. The importance and relevance of each specific macroeconomic factor depends on the type of product, characteristics of the financial instruments and the borrower. Quantitative models may not always be able to capture all reasonable and supportable information that may indicate a significant increase in credit risk. Qualitative factors may be assessed to supplement the gap. Examples of situations include changes in adjudication criteria for a particular group of borrowers; changes in portfolio composition and natural disasters impacting certain portfolios. With regards to delinquency and monitoring, there is a rebuttable presumption that the credit risk of the financial instrument has increased since initial recognition when contractual payments are more than 30 days overdue.

Retail portfolio – For retail exposures, a significant increase in credit risk cannot be assessed using forward looking information at an individual account level. Therefore, the assessment must be done at the segment level. Segment migration thresholds exist for each PD model by product which considers the proportionate change in PD as well as the absolute change in PD. The thresholds used for PD migration are reviewed and assessed at least annually, unless there is a significant change in credit risk management practices in which case the review is brought forward.

Non-retail portfolio – The Bank uses a risk rating scale (IG codes) for its non-retail exposures. All non-retail exposures have an IG code assigned that reflects the probability of default of the borrower. Both borrower specific and non-borrower specific (i.e macroeconomic) forward looking information is considered and reflected in the IG rating. Significant increase in credit risk is evaluated based on the migration of the exposures among IG codes.

Expected life

When measuring expected credit loss, the Bank considers the maximum contractual period over which the Bank is exposed to credit risk. All contractual terms are considered when determining the expected life, including prepayment, and extension and rollover options. For certain revolving credit facilities, the expected life is estimated based on the period over which the Bank is exposed to credit risk and how the credit losses are mitigated by management actions.

Presentation of allowance for credit losses in the Statement of Financial Position

- Financial assets measured at amortized cost: as a deduction from the gross carrying amount of the financial assets;
- Debt instruments measured at fair value through other comprehensive income: no allowance is recognized in the Statement of Financial Position because the carrying value of these assets is their fair value. However, the allowance determined is presented in the accumulated other comprehensive income;
- Off-balance sheet credit risks include undrawn lending commitments, letters of credit and letters of guarantee: as a provision in other liabilities.

Modified financial assets

If the terms of a financial asset are modified or an existing financial asset is replaced with a new one, an assessment is made to determine if the financial asset should be derecognized. Where the modification does not result in derecognition, the date of origination continues to be used to determine SIR. Where modification results in derecognition, the modified financial asset is considered to be a new asset.

Definition of default

The Bank considers a financial instrument to be in default as a result of one or more loss events that occurred after the date of initial recognition of the instrument and the loss event has a negative impact on the estimated future cash flows of the instrument that can be reliably estimated. This includes events that indicate:

- significant financial difficulty of the borrower;
- default or delinquency in interest or principal payments;
- high probability of the borrower entering a phase of bankruptcy or a financial reorganization;
- measurable decrease in the estimated future cash flows from the loan or the underlying assets that back the loan.

The Bank considers that default has occurred and classifies the financial asset as impaired when it is more than 90 days past due unless reasonable and supportable information demonstrates that a more lagging default criterion is appropriate.

Write-off policy

The Bank writes off an impaired financial asset (and the related impairment allowance), either partially or in full, when there is no realistic prospect of recovery. Where financial assets are secured, write-off is generally after receipt of any proceeds from the realization of security. In circumstances where the net realizable value of any collateral has been determined and there is no reasonable expectation of further recovery, write-off may be earlier. Credit card receivables 180 days past due, are written-off. In subsequent periods, any recoveries of amounts previously written off are credited to the provision for credit losses in the profit or loss statement.

2.17 Regulatory Credit Reserve

To cater for any excess of Bank of Ghana's credit loss provision requirements over loans and advances impairments based on IFRS principles, a transfer is made from the income surplus (distributable reserves) to a non-distributable reserves in the statement of changes in equity, being the Regulatory Credit Reserve.

The non-distributable Regulatory Credit Reserve ensures that minimum regulatory provisioning requirements as established by the Bank of Ghana are maintained.

2.18 Dividend

Dividends declared are treated as an appropriation of profit in the year of approval while dividends proposed are disclosed as a note to the financial statements.

2.15 Cash and cash equivalents

For the purposes of the statement of cash flow, cash and cash equivalents comprise cash on hand, cash and balances with the Central bank of Ghana and amounts due from banks and other financial institutions.

2.20 Leasing

The determination of whether an arrangement is a lease or not is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

Leases which do not transfer to the bank substantially all the risks and benefits incidental to ownership of the leased items are operating leases.

Operating lease payments are recognized as an expense in profit or loss on the straight line basis over the lease term. Contingent rental payable are recognized as expense in the period in which they occurred.

2.21 Borrowing

Borrowings by the Bank are initially recognized at fair value and there after stated at amortized cost. Associated net transaction costs of borrowings are recognized in profit or loss over the maturity period of the borrowings.

2.22 Repurchase and reverse repurchase agreements

Securities sold under agreements to repurchase at a specified future date are not derecognized in the statement of financial position as the Bank retains substantially all of the risks and rewards of ownership. The corresponding cash received is recognized in the statement of financial position as an asset with corresponding obligation to return it, including accrued interest as a liability within Cash collateral on securities lent and repurchase agreements, reflecting the transaction's economic substance as a loan to the Bank. The difference between the sale and repurchase prices is treated as interest expense and is accrued over the life of agreement using the Effective Interest Rate (EIR). When the counterparty has the right to sell or re-pledge the securities, the Bank reclassifies those securities in its statement of financial position to Financial assets held for trading pledged as collateral or to Financial investments available-for-sale pledged as collateral, as appropriate. Conversely, securities purchased under agreements to resell at a specified future date are not recognized in the statement of financial position. The consideration paid, including accrued interest, is recorded in the statement of financial position, within Cash collateral on securities borrowed and reverse repurchase agreements, reflecting the transaction's economic substance as a loan by the Bank. The difference between the purchase and resale prices is recorded in Net interest income and is accrued over the life of the agreement using the EIR. If securities purchased under agreement to resell are subsequently sold to third parties, the obligation to return the securities is recorded as a short sale within Financial liabilities held for trading and measured at fair value with any gains or losses included in Net trading income.

2 Financial guarantees, letters of credit and undrawn loan commitments

Financial guarantees are initially recognised in the financial statements (within Provisions) at fair value, being the premium received. Subsequent to initial recognition, the Bank's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the income statement, and – under IAS 39 – the best estimate of expenditure required to settle any financial obligation arising as a result of the guarantee, or – under IFRS 9 – an ECL provision. The premium received is recognised in the income statement in Net fees and commission income on a straight line basis over the life of the guarantee.

Undrawn loan commitments and letters of credits are commitments under which, over the duration of the commitment, the Bank is required to provide a loan with pre-specified terms to the customer. Similar to financial guarantee contracts, under IAS 39, a provision was made if they were an onerous contract but, from 1 January 2018, these contracts are in the scope of the ECL requirements.

The nominal contractual value of financial guarantees, letters of credit and undrawn loan commitments, where the loan agreed to be provided is on market terms, are not recorded on in the statement of financial position. The nominal values of these instruments together with the corresponding ECLs are disclosed in Note 33.

2 Other Assets

Other current assets is a default classification for assets which cannot be classified under any of the major assets classification on the face of the account, or are immaterial and need to be aggregated for presentation in a single line item in the balance sheet. Accounts included in the other current assets classification may includes inventory of consumables, prepayments and sundry debtors.

3.0 Significant Accounting Estimates, Assumptions & Judgments

The preparation of financial statements, in conformity with IFRS, requires management to make estimates, apply judgments and make assumptions that affect the reported amount of assets and liabilities at the date of the financial statements, and income and expenses during the reporting period. Estimates made by management are based on historical experience and other assumptions that are believed to be reasonable. Key areas where management has made difficult, complex or subjective judgments, often as a result of matters that are inherently uncertain, include those relating to the allowance for credit losses, the fair value of financial instruments (including derivatives), impairment of investment securities, impairment of non-financial assets and derecognition of financial assets and liabilities. While management makes its best estimates and assumptions, actual results could differ from these estimates and assumptions.

3.1 Going concern

The management of the Bank has made an assessment of the Bank's ability to continue as a going concern and is satisfied that the Bank has the required resources to continue in business for the foreseeable future.

Furthermore, the Bank's management is not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern. Consequently, the financial statements continue to be prepared on the going concern basis.

3 Deferred tax assets

Deferred tax assets are recognized for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized based upon the likely timing and level of future taxable profits together with future tax planning strategies. Deferred tax is shown in Note 14b.

3 Impairment of financial assets

The Bank makes an allowance for unrecoverable loans and receivables, held-to-maturity investments and available for sale financial assets when there is objective evidence that the carrying amount may not be recoverable. Significant management judgment is required to determine when objective evidence of impairment exists, and also in estimating future cash flows from the assets. Refer to 2.15(b) and (c) for details.

4 Application of new and revised International Financial Reporting Standards (IFRSs)

4 Standards and Interpretations effective in the current period

The following standards, amendments to the existing standards and interpretations issued by the International Accounting Standards Board were in issue:

The standards and interpretations that were issued but not yet effective for the financial year under review are disclosed below.

4 Standards and Interpretations in issue but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Bank's financial statements are disclosed below. The Bank intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

IFRS 16 Leases

The standard was issued in January 2016 and it replaces IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under IAS 17. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognise a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in

The Bank has performed a detailed impact assessment of IFRS 16. In summary the impact of IFRS 16 adoption is expected to be, as follows:

Societe Generale Ghana Limited
Notes to the Financial Statements
For the year ended 31 December 2018 - continued

Impact on the statement of financial position as at	
	GHS'000
Assets	
Property, plant and	11,784,937
Prepayment	(11,784,937)

Liability	-
Net Impact on	-
Equity	

Impact on the statement of profit or loss for 2018:	
	GHS'000
Depreciation on right of use asset	5,294,533.01
Rent Payment	(5,294,533.01)

IFRS 17 Insurance Contracts

In May 2017, the IASB issued IFRS 17 Insurance Contracts (IFRS 17), a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, IFRS 17 will replace IFRS 4 Insurance Contracts (IFRS 4) that was issued in 2005. IFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply. The overall objective of IFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in IFRS 4, which are largely based on grandfathering previous local accounting policies, IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of IFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts IFRS 17 is effective for reporting periods beginning on or after 1 January 2021, with comparative figures required. Early application is permitted, provided the entity also applies IFRS 9 and IFRS 15 on or before the date it first applies IFRS 17. This standard is not applicable to the Bank.

IFRIC Interpretation 23 Uncertainty over Income Tax Treatment

The Interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of IAS 12 and does not apply to taxes or levies outside the scope of IAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments. The Interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- How an entity considers changes in facts and circumstances

An entity has to determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed. The interpretation is effective for annual reporting periods beginning on or after 1 January 2019, but certain transition reliefs are available. The Bank will apply the interpretation from its effective date. Since the Bank operates in a complex multinational tax environment, applying the Interpretation may affect its consolidated financial statements. In addition, the Bank may need to establish processes and procedures to obtain information that is necessary to apply the Interpretation on a timely basis.

Amendments to IFRS 9: Prepayment Features with Negative Compensation

Under IFRS 9, a debt instrument can be measured at amortised cost or at fair value through other comprehensive income, provided that the contractual cash flows are 'solely payments of principal and interest on the principal amount outstanding' (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to IFRS 9 clarify that a financial asset passes the SPPI criterion regardless of the event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract.

The amendments should be applied retrospectively and are effective from 1 January 2019, with earlier application permitted. These amendments have no impact on the consolidated financial statements of the Bank.

Amendments to IFRS 10 and IAS 28: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments address the conflict between IFRS 10 and IAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that the gain or loss resulting from the sale or contribution of assets that constitute a business, as defined in IFRS 3, between an investor and its associate or joint venture, is recognised in full. Any gain or loss resulting from the sale or contribution of assets that do not constitute a business, however, is recognised only to the extent of unrelated investors' interests in the associate or joint venture. The IASB has deferred the effective date of these amendments indefinitely, but an entity that early adopts the amendments must apply them prospectively. The Bank will apply these amendments when they become effective.

Amendments to IAS 19: Plan Amendment, Curtailment or Settlement

The amendments to IAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event • Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect

Amendments to IAS 28: Long-term interests in associates and joint ventures

The amendments clarify that an entity applies IFRS 9 to long-term interests in an associate or joint venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (long-term interests). This clarification is relevant because it implies that the expected credit loss model in IFRS 9 applies to such long-term interests.

The amendments also clarified that, in applying IFRS 9, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognised as adjustments to the net investment in the associate or joint venture that arise from applying IAS 28 Investments in Associates and Joint Ventures.

The amendments should be applied retrospectively and are effective from 1 January 2019, with early application permitted. Since the Bank does not have such long-term interests in its associate and joint venture, the amendments will not have an impact on its consolidated financial statements.

Annual Improvements 2015-2017 Cycle (issued in December 2017)

• IFRS 11 Joint Arrangements

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in IFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

An entity applies those amendments to transactions in which it obtains joint control on or after the beginning of the first annual reporting period beginning on or after 1 January 2019, with early application permitted. These amendments are currently not applicable to the Bank but may apply to future transactions.

Societe Generale Ghana Limited
Notes to the Financial Statements
For the year ended 31 December 2018 - continued

• **IAS 12 Income Taxes**

The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognises the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognised those past transactions or events.

An entity applies those amendments for annual reporting periods beginning on or after 1 January 2019, with early application is permitted. When an entity first applies those amendments, it applies them to the income tax consequences of dividends recognised on or after the beginning of the earliest comparative period. Since the Bank's current practice is in line with these amendments, the Bank does not expect any effect on its consolidated financial statements.

• **IAS 23 Borrowing Costs**

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after 1 January 2019, with early application permitted. Since the Bank's current practice is in line with these amendments, the Bank does not expect any effect on its consolidated financial statements.

5.0 Transition to IFRS 9

(a) Reconciliation of IAS 39 to IFRS 9

The following pages set out the impact of adopting IFRS 9 on the statement of financial position, and retained earnings including the effect of replacing IAS 39's incurred credit loss calculations with IFRS 9's ECLs. The impact consists of reclassification and remeasurement.

Reclassification:

These adjustments reflect the movement of balances between categories on the Statement of Financial Position with no impact to shareholders' equity. There is no change to the carrying value of the balances as a result of the reclassification.

Remeasurement:

These adjustments, which include expected credit loss, result in a change to the carrying value of the item on the Statement of Financial Position with an impact to shareholders' equity net of tax.

The following table reconciles the aggregate opening loan loss provision allowances under IAS 39 and provisions for loan commitments and financial guarantee contracts in accordance with IAS 37 Provisions Contingent Liabilities and Contingent Assets to the ECL allowances under IFRS 9.

Societe Generale Ghana Limited
Notes to the Financial Statements
For the year ended 31 December 2018 - continued

	Provisions under IAS 39/IAS 37 as at 31 December 2017	Remeasurement	ECL under IFRS 9 at 1 January 2018
Cash and Cash Equivalents(due from Banks)	-	193,132	193,132

	167,625,121	30,356,344	197,981,465
Financial guarantees, Letters of Credit & Other commitments	-	6,623,956	6,623,956
	167,625,121	36,980,300	204,605,421

IMPACT ON BALANCE SHEET

RECONCILIATION OF THE ASSET SIDE BETWEEN IAS 39 AND IFRS 9

To determine the classification under IFRS 9 of financial assets recognised on balance sheet as at 31 December 2017, a detailed analysis of the following was performed:

- the characteristics of contractual cash flows based on facts and circumstances at the date of initial recognition of the instruments;
- the business models of its financial assets based on facts and circumstances at 1 January 2018.

The carrying amount of investments accounted for using the equity method has been adjusted according to IFRS 9 impacts on the financial assets held by those entities.

The following tables reconcile the asset side of the balance sheet as at 31 December 2017, prepared in compliance with IAS 39, and the asset side of the balance sheet as at 1 January 2018, prepared in compliance with IFRS 9.

Ref	IAS 39 Measurement			Remeasurement		IFRS 9		
	Category	Amount	Reclassification	ECL	Other	Amount	Category	
Cash and Cash Equivalents	A	L&R	757,751,599		(193,132)		757,558,467	AC

DESCRIPTION OF RECLASSIFICATIONS

Reclassification of available-for-sale to amortised cost (columns B and C)

• As at 31 December 2017, debt securities were classified as available for sale (AFS) securities measured fair value through other comprehensive income (FVOCI). These securities were mainly held as part of the cash management activities for the Bank's own account and as part of the management of HQLA (High Quality Liquid Assets) portfolios. An assessment of their business model and trend of their contractual cash flow indicates that they should be classified and measured at amortised cost under IFRS 9 at 1 January 2018. The business model is to hold and not to sell hence the amortised cost.

Reclassification of equity securities at cost to fair value through other comprehensive income (columns E and F)

• Equity securities have been classified by default as Financial assets at fair value through profit or loss for GHS 1,893,660.

DESCRIPTION OF VALUE ADJUSTMENTS

Limited effects of reclassifications (column A)

The application of the new accounting model for credit risk has caused an adjustment of impairment to Cash equivalent at 1 January 2018 by GHS193,000.

Adjustment in carrying value (column C)

The application of the new accounting model resulted in the reclassification of the bank's AFS financial instrument (measured at FVOCI) to Debt instrument measured at amortised cost. A remeasurement adjustment of GHS1,976,122 has been recognised at 1 January 2018

Additional Credit loss on loans and advances (column D)

Due to the application of the IFRS 9 in January 2018, an additional ECL of GHS30,163,212 has been recognised.

RECONCILIATION OF THE LIABILITY SIDE BETWEEN IAS 39 AND IFRS 9

The following table reconciles the liability side of the balance sheet as at 31 December 2017 prepared in compliance with IAS 39 and the liability side of the balance sheet as at 1 January 2018 prepared in compliance with IFRS 9.

Ref	IAS 39 Measurement		Reclassification	Remeasurement		IFRS 9

Societe Generale Ghana Limited
Notes to the Financial Statements
For the year ended 31 December 2018 - continued

The Bank contributes to three-tier defined contribution plan.

The employee pays 5.5% and the Bank pays 13% making a total of 18.5%. The Bank transfers 13.5% to the first tier , 5% to a privately managed and mandatory second tier for lump sum benefit and the remaining 2.5% is a levy for the National Health Insurance scheme.

The third tier is a voluntary provident fund and personal pension scheme to which the Bank contributes 10% of staff basic salary.

Termination Expenses

9 staff exited the bank in 2018 as a result of the Early Leavers Scheme instituted by the Bank. The Scheme is in line with the bank's policy to allow employees of the bank who have served the bank for a stipulated period of time and would want to exit to pursue other career interests outside the banking industry to do so with a package as stipulated in the Early Leavers Policy.

In accordance with the National Fiscal Stabilization Act, 2013 (Act 862) all companies in Banking, Non Bank Financial Institutions, Insurance, Mining, Brewery and Communication are supposed to pay a levy of 5% of profit before tax towards National Fiscal Stability .

14d Factors Affecting the Current Tax Charged for the year

A reconciliation of the charge that would result from applying the standard Ghana corporate tax rate to profit before tax to tax charge for the year is given below:

	2018	2017
	GHC	GHC
Pretax profit for the year	105,211,953	127,029,093
	-----	-----
Tax charge thereon at Ghana corporate tax rate of 25%	26,302,988	31,757,273
<i>Factors affecting Charge:</i>		
Non deductible expenses	18,551,247	6,099,110
Items of different tax rates	-	(120,950)
Income exempted	(6,875,161)	(7,565,299)
National Stabilisation Levy	5,260,598	6,351,455
	-----	-----
Tax on corporate profit (Note 14)	43,239,671	36,521,589
	=====	=====
Effective Corporate Income tax rate	41.1%	28.8%

The tax charge on profit for the year is based on Ghana's corporate tax rate of 25% (2016 : 25%).

15 Earnings per Share

Basic earnings per share is calculated by dividing the profit after tax for the year attributable to the equity holders of the Bank by the weighted average number of shares, held during the year after deducting treasury shares.

The following table shows the income and share data used in the calculation of the basic earnings per share:

	2018	2017
Profit attributable to shareholders of the Bank (GH¢)	61,972,281	90,507,504
Reconciliation Number of Shares

	=====	

Advans Ghana is a Savings and Loans company which specializes in the collection of deposits and giving of credits. Societe Generale Ghana has a 10% stake in the ownership of the company. It is an unlisted equity investment which is carried at fair value through profit or loss.

YUP Ghana Limited has been incorporated as a private company limited by shares. The Company is registered with 500,000,000 shares of no par value with Societe Generale Group having a 75% interest and Societe Generale Ghana having a 25% interest. The nature of business which the company is authorized to carry on are the distribution of electronic money. YUP Ghana Limited is fully registered with the Ghana Investment Promotion Centre to enable operations to commence.

In line with the Regulations of the Central Bank, YUP Ghana Limited has submitted an application to the Bank of Ghana for approval under the Banks and Specialized Deposit Taking Institutions Act 2016 Act 930. However, Bank of Ghana is yet to grant approval for YUP Ghana Limited to commence full operations. This is due to the fact that the Payment Systems and Services Bill 2017 has not yet been passed by Parliament and assented to by the President of the Republic of Ghana. When fully operational YUP Ghana will be held under our subsidiary SSBI.

SG Ghana is in the process of holistically moving all its equity investments in other body corporates for which the bank holds more than 5% interest to its investment subsidiary SSBI as required by Section 73(3) of the Banks And Specialised Deposit-Taking Institutions Act (ACT 930).

Loan provisioning/impairment are carried out in accordance with Bank of Ghana Policy as well as the principles of IFRS. Loan impairment losses calculated based on IFRS principles are passed through the statement of comprehensive income. Where provisions per IFRS is more than provisions per of Bank of Ghana guidelines, no regulatory credit reserve is required.

When the credit loss provision calculated under IFRS principles is less than what is required under the Bank of Ghana, transfers are made from the income surplus account into the non- distributable regulatory credit reserves.

Societe Generale Ghana Limited
Notes to the Financial Statements
For the year ended 31 December 2018 - continued

Management determined that the Land and Buildings of the Bank constitute a separate class of property, plant and equipment, based on the nature, characteristics and risks of the property. Fair value of the properties was determined using the market comparable method. The valuations have been performed by the valuer and are based on proprietary databases of prices of transactions for properties of similar nature, location and condition. As at the dates of revaluation on 8th May 2017, the fair values of the Bank's Land and Buildings were based on valuations performed by Value Properties and KOA Consult who are both accredited independent valuers who have valuation experience for similar office properties in Ghana. A net gain from the revaluation of the Land and Buildings of GHS 109,979,770 in 2017 was recognised in OCI. Fair value measurement disclosures for the revalued office properties are provided in Note 36.

Derivative Financial Instruments

The table below shows the fair values of derivative financial instruments recorded as assets or liabilities together with their notional amounts. The notional amount, recorded gross, is the amount of a derivative's underlying asset, reference rate or index and is the basis upon which changes in the value of derivatives are measured. The notional amounts indicate the volume of transactions outstanding at the year end and are indicative of neither the market risk nor the credit risk.

	2018 GHC	2018 GHC	2017 GHC	2017 GHC
	Fair value of derivatives held for trading GHC	Notional amount GHC	Fair value of derivatives held for trading GHC	Notional amount GHC
Foreign Exchange SWAP	5,380,059.81 =====	517,977,952.00 =====	- =====	 =====

Most of the Bank's derivative trading activities relate to deals with customers that are normally offset by transactions with other counterparties. The Bank may also take positions with the expectation of profiting from favourable movements in prices, rates or indices. The derivatives of the bank are fair valued at level 2 using the discounted cash flow method. Future cash flows are estimated based on forward exchange rates (from observable forward exchange rate at the end of the reporting period) and contract forward rates, discounted at a rate that reflects the credit risk of various counterparties.

	=====	=====

The Bank has not had any defaults of principal, interest or other breaches with regard to any liabilities during 2018 or 2017.

Summary of Borrowing Arrangements

Societe de Promotion et de Participation pour la Cooperation Economique (PROPARCO). This is a USD 30 million long-term credit line ('the facility') granted to the bank. The first draw down of USD 6 million has a fixed interest rate of 5.12% and will mature on 30 April 2020. The second draw down of USD 4 million has a fixed interest rate of 5.19% and will mature on 30 April 2020. The third draw down was EUR7.5 million. The related interest rate is 6-months Libor plus a margin of 370 basis points and will mature on 31 October 2024. As at 31 December 2018 the amounts outstanding were \$ 2.727m and € 5.5m

European Investment Bank (EIB). This is a EUR 20 million credit facility extended to the bank by EIB. The loan is to be drawn in EUR and/or USD and to be used to finance up to 50% of the banks capital expenditure intended to develop the bank's intermediation capacities (such as developing its branch network, IT Systems, training etc.) and for financing eligible Private Sector Small and Medium Sized Enterprises. The interest rate on the drawn portion is fixed at 5.422% and matures on 1 April 2024. As at 31 December 2018 the outstanding balance is \$ 6.05m.

International Finance Corporation (IFC). A new facility for USD 20 million IFC Senior Loan was signed in June 2017. The loan is to be used to exclusively finance trade-related lending activities of the bank by way of sub-loans to eligible borrowers. None of the proceeds of the IFC Senior Loan may be used to refinance or reschedule existing indebtedness of an eligible sub-borrower (including debt to equity conversions) unless that refinancing or scheduling is part of a financial restructuring aimed at the acquisition of new capital assets by that eligible sub-borrower. The current interest rate is 3-months LIBOR plus a margin of 375 basis points. As at 31 December 2018 the outstanding balance is nil.

Export Trade, Agriculture and Industrial Development Fund (EDAIF) is a public Investment Fund operating as an agency of the Ministry of Trade and Industry and governed by an Act of parliament. The objective of the fund is to provide financial resources for the development and promotion of: export trade, agriculture related to agro-processing and industrial development. The Fund is sustained by inflows from the following sources: 0.75% of value of non-petroleum commercial imports; 10% of net divestiture proceeds; such other monies as the Minister of Finance in consultation with the Minister of Trade and Industry with Parliament's approval may determine to be paid into the Fund; recoveries of loans and interest payments, etc.

Current interest rate applicable on credit facilities is 12.5% (which is subject to review by the board from time to time). No minimum loan is prescribed but the maximum loan per borrower is pegged at GHC 10.0 million. Facility tenures are short term - not exceeding 2 years, medium term - not exceeding 5 years and long term - for a period not exceeding 10 years.

Societe Generale Ghana Limited
Notes to the Financial Statements
For the year ended 31 December 2018 - continued

Repurchase Agreement. The Bank has no programme to borrow and lend securities but to sell securities under agreements to repurchase (repos) and to purchase securities under agreements to resell (reverse repos).

Securities sold under agreements to repurchase at a specified future date are not derecognised from the statement of financial position as the Bank retains substantially all of the risks and rewards of ownership. The corresponding cash received is recognised in the statement of financial position as an asset with a corresponding obligation to return it, including accrued interest as a liability within cash collateral on securities lent and repurchase agreements, reflecting the transaction's economic substance as a loan to the Bank. The difference between the sale and repurchase prices is treated as interest expense and is accrued over the life of agreement using the EIR.

Conversely, securities purchased under agreements to resell at a specified future date are not recognised in the statement of financial position. The consideration paid, including accrued interest, is recorded in the statement of financial position, within Cash collateral on securities borrowed and reverse repurchase agreements, reflecting the transaction's economic substance as a loan by the Bank. The difference between the purchase and resale prices is recorded in Net interest income and is accrued over the life of the agreement using the EIR.

The following table summarises the carrying amount of the assets and liabilities under the repurchase agreement

	1,000,000,000	500,000,000
	=====	=====

Number of ordinary shares of no par value

During the 38th Annual General meeting of the Bank, a resolution was passed to increase the number of authorised shares from 500,000 to 1,000,000. This was done in anticipation of the demands of the processes required to increase the the stated capital of the bank to at least GHS 400 million in line with the new capital requirement as announced by the Central bank. The current stated capital of the Bank is GHS404,245,427.

	2018		2017

b. Issued and fully paid ordinary shares				
Issued and fully paid ordinary shares	709,141,367	404,245,427	429,060,180	138,302,925
	=====	=====	=====	=====

Increase in Stated Capital

In September 2017, the Bank of Ghana announced a new minimum capital requirement for banks operating in the country. The Central Bank revised upward the minimum paid up capital for existing banks and new entrants from GH¢120M to a new level of at least GH¢400M. All existing banks had up to December 31, 2018 to meet the new minimum paid up capital requirement.

In line with the new requirement, Societe Generale Ghana did the following:

- Bonus Issue – This was done by a transfer of an amount of GHS 97M transferred from income surplus to Stated capital in a proportion of 1 ordinary share to 6 existing shares held by a qualifying shareholder. New shares were issued to shareholders in the proportion of their existing shareholdings and thus no dilution of ownership occurred. The exercise was completed in April 2018
- Rights issue - A total of 208,570,990 ordinary shares were issued at no par value at GHS 0.81 per share in a ratio of 1 new share for every 2.400 shares held by a qualifying shareholder. As shareholders had a choice to decide whether to exercise their rights or not, some dilution of ownership occurred after the exercise. The exercise was completed in November 2018 and a total of GHS168,942,502 was realised.

30 Other Reserves	2018	2017

	=====	=====

Dividends are treated as appropriation of profit in the year of approval by shareholders. But dividends proposed are disclosed as Notes to the Financial Statements.

No dividend was proposed or declared before the financial statements were authorised for issue, but not recognised as a distribution to owners during the period.

32 Related Party Transactions / Disclosures

A number of banking transactions were entered into with related parties in the normal course of business. These include loans and placements. Loans to related parties is done at arm's length and approved by the highest approving authority as spelt out in the Banks and Specialized Deposit Taking Institutions Act, 2016 Act 930.

- a) The person to whom the credit facility is given has credit worthiness which is not less than that normally required by the Bank or other persons to whom credit facilities are given.
 - b) A collateral provided will be evaluated on the same terms and procedures normally required by the Bank for any other person to whom a credit facility is given
 - c) The terms and conditions of the credit facility are not less favourable to the Bank than those normally offered to other persons and
 - d) The granting of the credit facility is in the interest of the bank.
- The credit facility shall be approved by the Board of Directors.

During the year the following transactions were performed with related parties:

a. Interest paid and interest received from related parties during the year

		=====	=====

To meet the financial needs of customers, the Bank enters into various irrevocable commitments and contingent liabilities. These consist of financial guarantees, letters of credit and other commitments to lend. Even though these obligations may not be recognised on the statement of financial position, they contain credit risk and, therefore, form part of the overall risk of the Bank.

Letters of credit and guarantees (including standby letters of credit) commit the Bank to make payments on behalf of customers in the event of a specific act, generally related to the import or export of goods. Guarantees and standby letters of credit carry a similar credit risk to loans. The nominal values of such commitments are listed below.

Impairment losses on guarantees and other commitments

An analysis of changes in the gross carrying amount and the corresponding allowance for impairment losses in relation to guarantees and other commitments is, as follows:

Financial guarantees

The table below shows the credit quality and the maximum exposure and year-end stage classification

	Stage 1 Individual	Stage 2 Individual	Stage 3 Individual	Total

At 31 December 2018	5,959,016	-	-	6,623,656

34 Legal Liability

Litigation is a common occurrence in the Banking industry due to the nature of the business undertaken. The Bank has formal controls and policies for managing legal claims. Once professional advice has been obtained and the amount of loss reasonably estimated, the Bank makes adjustments to account for any adverse effects which the claims may have on its financial standing. At year-end, the Bank had several unresolved legal claims.

Adequate provision has been made for all the relevant litigation for which losses may be probable. The probable outflow which could result from all such litigation, based on the current status of the various legal proceedings, is estimated to be no more than GH¢1,220,800 while the timing of the outflow is uncertain.

Societe Generale Ghana Limited

Notes to the Financial Statements

For the year ended 31 December 2018 - continued

35 Analysis of Financial Assets and Liabilities

Financial assets and liabilities are measured on an on-going basis either at fair value or at amortized cost. The principal accounting policies in Notes 2 describe how the classes of financial instruments are measured and how income and expenses, including fair value gains and losses, are recognized. The following table analyses the financial assets and liabilities in the statement of financial position by class of financial instrument

36 Determination of Fair Value and Fair Values Hierarchy

The Bank uses the following hierarchy for determining and disclosing the fair value of financial instruments by the valuation technique:

- Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities
- Level 2: Other techniques for which all inputs have a significant effect on the recorded fair
- Level 3: Techniques for which inputs have a significant effect on the recorded fair value that are not based on observable

Financial assets and liabilities measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions are assets and liabilities for which pricing is obtained via pricing services, but where prices have not been determined in an active market, financial assets with fair values based on broker codes, investment in private equity funds with fair values obtained via fund managers and assets that are valued using the Bank's own models whereby the majority of assumptions are market observable.

Non-market observable inputs means that fair values are determined in whole, or in parts, using a valuation technique, based on assumptions that are neither supported by prices from observable current market transactions in the same instrument, nor are they based on available market data. The main asset classes in this category are unlisted equity investments and debt instruments. Valuation techniques are used to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. Therefore, observable inputs reflect the Bank's own assumption about the assumptions that market participants will use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available which might include the Bank's own data.

The following table shows an analysis of financial instruments recorded at fair value by level of the fair value hierarchy done on a recurring basis.

There were no transfers between levels 1 and 2 within the period.

Level 2 Valuation Technique

The assets in Level 2 comprise mainly Government of Ghana securities (Treasury Bills). They are valued using published results of tender for government of Ghana and Bank of Ghana bill, notes and bonds at the financial year end.

Level 3 Valuation Technique

The assets in Level 3 comprise revaluation gain on the Bank's fixed assets. Fair value of the properties was determined using the market comparable method. The valuations have been performed by the valuer and are based on proprietary databases of prices of transactions for

Day 1 Profit

The day 1 profit recognised on the derivative financial instrument was GH¢140,000 (2017: Day 1 profit of GH¢738,108).

37 Financial risk management

Risk is inherent in the Bank's activities but is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Bank's continuing profitability and each individual within the Bank is accountable for the risk exposures relating to his or her responsibilities.

The Bank is exposed to credit risk, liquidity risk, interest rate risk and market risk. It is also subject to various operating risks.

The independent risk control process does not include business risks such as changes in the environment, technology and industry. The Bank's policy is to monitor those business risks through the Bank's strategic planning process.

Risk Management Structure

The Board of Directors is ultimately responsible for identifying and controlling risks. However, there are separate independent bodies responsible for managing and monitoring risks.

Board of Directors

The Board of Directors is responsible for the overall risk management approach and for approving the risk management strategies and principles.

Risk Committees

The Risk Committees have the overall responsibility for the development of the risk strategy and implementing principles, frameworks,

- i. Credit Risk Committee - Quarterly;
- ii. Asset and Liabilities Committee - Weekly;
- iii. Structural Risk Committee - Quarterly;
- iv. Market Risk Committee - Quarterly;
- v. Operational Risk Committee (Periodic and Permanent Control, Business Continuity Planning and Compliance) - Quarterly.

Risk Management

Risk Management is done under specialists units of Credit and Market Risk Department and Operational and Permanent Control Division. These units are responsible for implementing and maintaining risk related procedures to ensure independent control process is maintained. Societe Generale Ghana Risk is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls.

This process of risk management is critical to the Bank's continuing profitability and each individual within the Bank is accountable for the risk exposures relating to his or her responsibilities. The Bank is exposed to credit risk, liquidity and interest rate risk and market risk. It is also subject to various operating risks. The independent risk control process does not include business risks such as changes in the environment,

Risk Control

Risk Control is done under the various specialist units of Risk Management where monitoring of compliance with risk principles, policies and limits across the Bank is undertaken. Each business group has its own unit which is responsible for the independent control risks, including monitoring the risk of exposures against limits and the assessment of risks of new products and structured transactions. These units also ensure the complete capture of the risk in risk measurement and reporting systems through the various committees to the Board.

Bank Treasury

The Bank's Treasury is responsible for managing the Bank's assets and liabilities and the overall financial structure. It is also primarily responsible for the funding and liquidity risks management of the Bank.

Internal control systems

The bank has in place internal control systems and mechanisms aimed at ensuring that legal and regulatory provisions, ethics, and professional practices are complied with, internal processes of the bank are functioning properly and the financial information are reliable. The system is particularly designed to identify malfunctions and irregularities, to efficiently control risks, and to make sure that information systems are reliable. Internal control system distinguishes two levels of control: Permanent Control which forms the first level of control and Periodic Controls as a second level of control.

Permanent Control is essential for the bank's internal control structure and is defined as all procedures implemented on a permanent basis to guarantee that operations carried out on an operational level are correctly handled, secure and valid. It is based on day-to-day security, which is everyone's responsibility and on formal supervision carried out by management.

Periodic control activities are performed by dedicated and specialized teams of auditors which are independent from the operational entities. The scope of Periodic Controls encompasses all the bank's activities and can focus on any aspect of these activities, without any restrictions.

Internal Audit

The Bank's policy is that risk management processes throughout the Bank are audited annually by the internal audit function, which examines both the adequacy of the procedures and the Bank's compliance with the procedures. Internal Audit discusses the results of all assessments with management, and reports its findings and recommendations to the Audit Committee.

The most significant risks which the bank is exposed to and how they are managed are as below:

37 Financial risk management - continued

Credit risk

Credit risk is the risk that the Bank will incur a loss because its customers or counterparties fail to discharge their contractual obligations.

The Bank manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentrations, and by monitoring exposures in relation to such limits.

The Bank also manages its counter party risk through adherence to Bank of Ghana prudential requirements by ensuring that its secured lending to any single borrower is below 25% of its net worth and that any single unsecured lending by the bank is less than 10% of the bank's net worth.

The framework for managing this risk is the credit policy which spells out the overall underwriting standards, credit approval process, credit administration and recovery processes. The policy is reviewed from time to time (at least yearly) in response to risk profile of new business opportunities/products, and any challenges with the recovery process.

The Bank has established a credit quality review process through the Credit Committee to provide early identification of possible changes in the creditworthiness of counterparties, including regular collateral revisions. Counterparty limits are established by the use of a credit risk classification system, which assigns major counterparty a risk rating.

Risk ratings are subject to regular revision.

The credit quality review process aims to allow the Bank to assess the potential loss as a result of the risks to which it is exposed and take

The Bank's credit quality review process is established in line with the Societe Generale Group's risk management governance based on the following;

- A strong managerial involvement throughout the entire organization: From the Board of Directors through to the Credit Committee and to the operational field management teams.
- A tight framework of internal procedures and guidelines.
- A well defined permanent supervision process that assists to identify through a self examination the need for review of certain processes to improve on the Bank's credit delivery and collection processes.
- Independence of Risk assessment department from the business divisions;
- A consistent approach to risk assessment and monitoring applied throughout the Group.

Societe Generale Ghana Limited
Notes to the Financial Statements
For the year ended 31 December 2018 - continued

The bank in estimating and establishing its potential credit losses, counterparty limits are established by the use of a credit risk classification system, which assigns major counterparties a risk rating. Risk ratings are subject to regular revision.

The credit quality review process aims to allow the bank to assess the potential loss as a result of the risks to which it is exposed and take corrective action.

The Credit Committee also monitors the portfolio of loans and debt collection operations.

In this capacity, it does:

- analyze the portfolio of loans: retail customers, companies, banks and financial institutions and sovereign,
- monitor irregular commitments and the main sensitive risks,
- monitor debt collection files,
- assess guarantees and monitor provisions,
- ensure that the actions reported are monitored and performed

In line with the bank's policy, the provisions have been made for all delinquent facilities in addition to a collective provisioning done for all sensitive and potentially sensitive clients.

At 31 December 2017, the bank's credit exposure were categorised as follows:

- Exposures that are neither past due nor impaired
- Exposures that are past due but not impaired and
- Individually impaired facilities

The balances for each category have been analysed below;

	2017
	Loans & advances to customers GHC
Neither past due nor impaired	1,284,344,950
Past due but not impaired	114,042,900
Individually impaired	232,767,480

Gross	1,631,155,330
Less Allowance for impairment	(167,625,121)
Interest in suspense	(33,386,832)
Deferred Income	(20,591,864)

Net amount	1,409,551,513 =====

Loans and advances to customers Past due but not impaired have not been delinquent for more than 30 days.

Loans and advances to customers in Ghana analysed by customer type, as well as by industry sector is shown in note 19(b) & 19(c) above.

Fair Value of Collateral Held

The Bank holds collateral against loans and advances to customers in the form of mortgage interests over property, other registered securities over assets, and guarantees. Estimates of fair value are based on the value of collateral assessed at the time of borrowing, and generally are not updated except when a loan is individually assessed as impaired.

An estimate of the fair value of collateral and other security enhancements held against financial assets is shown below:

	2018	2017
	GHC	GHC
Against Impaired Assets	425,564,332	338,795,332
Against Past Due but not Impaired Assets	145,212,545	121,014,847

	=====	=====

Liquidity risk and Structural interest rate risk

Liquidity risk

Liquidity risk arises from the mismatch of the timing of cash flows relating to assets and liabilities. The liquidity policy of the Bank is approved by the Board under guidelines issued by Societe Generale Group and monitored daily to ensure that its funding requirements can be met at all times and that a stock of high quality liquid assets is maintained.

The net liquidity gap resulting from liquidity analysis of assets and liabilities of the Bank as of 31 December 2018 is shown in the table below.

Maturity analysis of assets and liabilities

The table shows a summary of assets and liabilities analysed according to their undiscounted contractual terms of the transactions and models of historic client behaviour as well as conventional assumptions for some balance sheet items.

Structural interest rate

The interest rate risk is the incurred risk in case of interest rate variations because of all on-and off- financial position operations, except operations subject to market risks. Global Interest Rate Risk is corresponding to interest rate on the banking portfolio.

The strategic management of liquidity is done at a high level of senior management (ALCO); review of results on weekly basis in line with competition and economic conditions and also ensure that regulatory requirements are met.

The risk management is supervised by the Group. Limits are defined at Group consolidated level and at the level of each Group consolidated entity, and are validated by the Credit Risk Committee. Finance department of the Group is responsible for checking the risk level of Societe Generale Ghana Limited.

Societe Generale Ghana Limited's main aim is to reduce its exposure to structural interest rate risk as much as possible. To this end, any residual interest rate risk exposure must comply with the sensitivity limits set by the Finance Committee. The sensitivity is defined as the variation in the present value of future (maturities of up to 20 years) residual fixed rate positions (surplus or deficits) for a 1% parallel increase in the yield curve (i.e. this sensitivity does not relate to the sensitivity of annual net interest income). The limit for Societe Generale Ghana Limited is within the range of EUR -1.1 and 5.9 million (i.e. between GH¢ -5.83 and 31.25 million) This limit is -1.12% and 6.02% of shareholders' equity in reference to the lower and upper limits respectively.

In order to quantify its exposure to structural interest rate risks, Societe Generale Ghana Limited analyses all fixed- rate assets and liabilities on future maturities to identify any gaps. These positions come from their maturities.

Once the Bank has identified the gaps of its fixed- rate positions (surplus or deficit), it calculates the sensitivity (as defined above) to variations in interest rates. This sensitivity is defined as the variation of the net present value of the fixed-rate positions for an instantaneous parallel increase of 1% of the yield curve.

37 Financial risk management - continued

Interest Rate Risk Exposure

Interest rate risk exposure is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in

Sensitivity of projected increase or decrease in interest rate is analysed below.

	Increase/decrease in basis points		Effect on profit before tax		Effect on equity

Market risk

Market risk is the risk of losses being incurred as a result of adverse movements in interest or exchange rates and arises in the Bank's treasury activities.

Market risk is controlled by interest mismatch and foreign currency open position limits approved by the Executive Committee of the Bank and monitored daily. The foreign currency exposure analysis of the Bank is shown in the currency exposure table below.

This risk is managed by the establishment of limits, monitoring of exposures on a daily basis and ensuring that regulatory requirements are met.

The task of the Market Risk Committee is to:

- identify, assess and monitor the market risks generated by transactions made on behalf of:
- the local Financial department (cash, liquid assets, balance sheet hedging) in relation with the Assets and Liabilities
- professional customers (companies and institutional investors)
- define and monitor alert procedures
- make sure that the Back Office is really independent from the Front Office.

Exchange rate sensitivity analysis

The Bank's foreign exchange exposures comprise trading and non-trading foreign currency translation exposures. Foreign exchange exposures are principally derived from customer driven transactions. The sensitivity rates used represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for the changes in foreign currency rates. A positive number below indicates an increase in Profit or Equity whilst a negative number indicates a decrease in Profit or Equity. The profits below are the result of a net long exposure in the foreign currency coupled with an increase in the foreign currency rate. The losses on the other hand are mainly due to a net long exposure in the foreign currency coupled with a decrease in the foreign currency rate.

31 October	Increase/decrease in basis points		Effect on profit before tax		Effect on equity	
	2018		2018		2018

Other currencies	5%	-5%	112,131	112,131	28,033	28,033

Exchange rate sensitivity analysis

The following methods and assumptions used in the computation of sensitivity analysis

- i Foreign currency exposure is assumed to remain at constant values (closing balances at the end of the year).
- ii Use of average exchange rate for the year under consideration.
- iii Use of pre-determined stress levels (relevant range of stress level) based on extreme or worst case scenarios.
- iv There are no changes in the methods and assumptions from the previous periods.
- v The current corporate tax rate is applied in determining the effect on profit and equity.

Methods and assumptions used in the computation of sensitivity analysis

Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The open positions of currencies held are monitored on a daily basis. The objective of monitoring the open position in foreign currency is to manage foreign exchange risk due to movements in rates as well as changes in liquidity positions. The bank has adopted the Bank of Ghana requirement that banks maintain a total open position which is not more than 10% of their net worth. Within this limit, banks are also required to maintain single currency open positions not more than 5% of net worth.

Currency Exposure

The table below summarises the Bank's exposure to foreign exchange rate risks at year-end. The amounts stated in the table are the cedi equivalent of the foreign currencies.

31 December 2018

Operational Risk

Operational risk is the exposure to financial or other damage arising through unforeseen events or failure in operational processes and systems. Examples include inadequate controls and procedures, human error, deliberate malicious acts including fraud and business interruption.

These risks are controlled and monitored through system controls, segregation of duties, exception and exposure reporting, business continuity planning, reconciliations, internal audit and timely and reliable management reporting.

Operational procedures are documented in an Operations Manual.

The Bank has established and implemented an integrated Operational Risk (OR) framework comprising (i) Loss Collection policy, (ii) Key Risk Indicators (KRI) policy, (iii) Permanent Supervision policy, (iv) Compliance and anti- money laundering. Policy which set out the organizational structure, overall policy framework, processes and systems for identifying, assessing, monitoring and controlling/ mitigating operational risks in the bank.

Societe Generale Ghana Limited has adopted the Societe Generale Group BCP policy and methodology which is consistent with international standards.

The Bank has also created a comprehensive and independent review of the Business Continuity Planning and Operational Risk processes.

The Operational Risk Committee's task is to identify and assess the impact of operational risks on the smooth running and profitability of the bank, and to define and implement the strategy used to control them by continuously adapting the methods used to bring them into conformity with regulations in force and Societe Generale Group standards.

To achieve this, the committee:

- makes sure that the resources made available to the Operational Risk team are in line with the Bank's level of exposure.
- is responsible for the introduction and satisfactory operation of permanent supervision, and for the bank's Operational Risk control.
- is informed of the main types of operational risks and of the main operating losses recorded over the period.
- monitors the implementation of plans of action intended to correct and reduce Operational Risks.
- validates the findings of regulatory exercises (Risk & Control Self Assessment (RCSA), scenario analysis, KRI), introduces and introduces, maintains and tests the BCP and the Crisis management system.
- makes sure that the work done by Permanent Supervision is of good quality and approves its report.
- takes corrective action in the event of a deterioration in the control environment.
- keeps up to date with legislative and regulatory changes, as well as recommendations relating to periodic control.
- drafts and presents its activity report particularly intended for the Audit and Accounts Committee.

Non Compliance & Reputation Risk and the prevention of Money Laundering

The compliance function ensures that the risks of legal, administrative and/or disciplinary penalties, financial losses or injury to reputation,

The bank's compliance activity is overseen at a high level by a senior management officer, the Head of Compliance and through the Compliance committee chaired by the Managing Director.

The main tasks of the compliance function are namely:

- to define in accordance with legal and regulatory requirements, the policies, principles and procedures applicable to compliance and the prevention of money laundering and terrorist financing and ensure that they are implemented.
- to ensure that professional and financial market regulations are respected.
- to prevent and manage any potential conflicts of interest with respect to customers.
- to train and advise staff and increase their awareness of compliance issues.

38 Regulatory Breaches

In October 2018, SG Ghana received a letter from the Bank of Ghana (BOG) indicating that it had been fined for non-submission of Anti-Money Laundering Report. The BOG imposed a fine of Six Thousand Units which transposed to Seventy-Two Thousand Ghana Cedis, for non-submission of the reports.

SG Ghana responded that the reports had been submitted on 27th July 2018 and 28th August 2018 respectively. The Central bank reviewed to fine to Three Thousand Penalty Units, amounting to Thirty-Six Thousand Ghana Cedis (GHS36,000).

Notes to the Financial Statements

39 Segmental Reporting

For management purposes, the bank is organized broadly into three operating segments based on products and services as follows;

- Retail Banking

This unit primarily serves the needs of individuals, high net worth clients, institutional clients and very small businesses. It is principally responsible for providing loans and other credit facilities, as well as mobilizing deposits and providing other transactions.

- Corporate Banking

This unit is principally responsible for providing loans and other credit facilities, as well as mobilizing deposits and providing other transactions to the Bank's corporate clients.

- Treasury

This unit undertakes the bank's funding activities. It also manages the liquidity position of the Bank through activities such as borrowings, and investing in liquid assets such as short-term placements and government debt securities.

Management monitors the operating results of each business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss which in certain respects is measured differently from operating profit or loss in the financial statements. The main source of difference is the use of a transfer pricing mechanism in apportioning investment income for the segment.

40 Capital

Capital management

The primary objectives of the Bank's capital management are to ensure that the bank complies with externally imposed capital requirement by Bank of Ghana and that the bank maintains strong credit rating and healthy capital ratios in order to support its business and to maximise shareholders value. The Bank manages its capital structure and makes adjustment to it in the light of changes in the economic conditions and risk characteristics of its activities. In order to maintain or adjust the capital structure, the Bank may adjust the amount of dividend payments to shareholders, return capital to shareholders or issue capital securities. No changes were made in the objectives, policies and processes from the previous years.

a. Capital Definition

The Bank's capital comprises stated capital, share deals account, retained earnings including current year profit and various reserves the company is statutorily required to maintain. As a bank, it also has regulatory capital as defined below:

b. Stated Capital

This amount is made up of issue of shares for cash and transfers from retained earnings.

c. Income Surplus

This amount represents the cumulative annual profits after appropriations available for distribution to shareholders.

d. Revaluation Reserve

This amount comprises revaluation of property, plant and equipment.

e. Statutory Reserve

This is amount set aside from annual profit as a non-distributable reserve in accordance with regulatory requirements.

The transfer to Statutory Reserve Fund is in compliance with the Banks and Specialized Deposit Taking Institutions Act, 2016 Act 930.

40 Capital - continued

f. Credit Risk Reserve

This is amount set aside from retained earnings as a non-distributable reserve to meet minimum regulatory requirements in respect of allowance for credit losses for non-performing loans and advances.

g. Other Reserves

This is made up of available for sale reserve on debt securities and available for sale on equity investments. Available for sale reserve on debt securities records unrealized gains and losses on government securities. Available for sale reserve on equity investments records unrealized fair value gains and losses on available for sale equity investments.

Under the IFRS 9 Available for sale assets have been reclassified under Amotised cost and equity investments have been reclassified as fair value through profit or loss.

h. Regulatory Capital

Regulatory capital consist of Tier 1 capital, which comprises share capital, share deals account, retained earnings including current year profit, foreign currency translation and minority interests less accrued dividend, net long positions in own share and goodwill. Certain adjustments are made to IFRS-based result and reserves, as prescribed by the Central Bank of Ghana. The other component of regulatory capital is Tier 2 capital which includes revaluation reserves.

j. Capital adequacy

The adequacy of the Bank's capital is monitored using, among other measures, the rules and ratios established by the Basel Committee on Banking Supervision and adopted by the Bank of Ghana. The capital adequacy ratio of the Bank as of 31 December 2018 is shown below:

	2018	2017
	Actual	Actual
	GHC	GHC
