These include:

- Merban Investment Holdings Limited is the Manager of the Merban Fund. MIHL has over 37 years experience in fund management and currently manages assets in excess of GH¢180 million on behalf of provident funds, foundations, churches, individuals as well as MIHL's proprietary funds..
- The staff of MIHL are experienced, highly trained and proficient in their field of work. The team is well resourced to effectively manage the fund.
- MIHL is therefore able to provide advanced portfolio management services to shareholders at a relatively small price.

Efficient Fund Administration Processes

- MIHL has a modern fund administration software that will maintain a register of all shareholders and also hold an account for every shareholder in the fund.
- The account with records of all transactions – additional investments or withdrawals – will be made available to shareholders regularly.

Diversification

- The Fund will invest in a wide range of listed and unlisted companies and fixed income securities across all spectrums of the economy. This spread will reduce the risk of the portfolio, whilst maximising returns. Diversifications of investments leads to cross-cancellation of risks i.e. risk reduction, an optimally balanced portfolio and the achievement of optimum returns.

Liquidity

- The Merban Fund will keep a minimum of 5% of its fund value in cash or on such other liquid security. The Manager of the Fund is obliged to buy-back shares on demand of a shareholder, consequently providing substantial liquidity to investors.
- It is therefore easy to invest in the fund and there are no restrictions on exits
- Returns made by the fund are tax-exempt and therefore providing additional funds to shareholders i.e. the enjoyment of full return on their investment.

Independent Custodian

- The shareholders will have the protection of the Custodian who keeps the assets the Fund separate from the Fund Manager and exercises supervisory duties as

required by law and stated in the Custodian agreement.

Low Operating Costs

- As the fund is expected to be a large pool of funds with professional management, costs incurred (e.g. trade commissions and other charges) are proportionately lower compared to individuals/institutions who deal on their own. Lower transactions costs can translate into significantly better investment performance.

What are the risks associated with the Fund?

Specific factors can adversely affect the growth and value creation objective of the Fund. These include:

Stock Market Volatility

- Changes in the economy can impact positively or negatively on share prices and stock market performance. Generally, investment in equity securities carries greater risk compared to investment in money market instruments such as treasury bills. While returns on equity investments can be very rewarding, the risks associated with it is equally high.

Foreign Exchange Risk

- Shareholders who purchase shares using foreign currency may be subject to fluctuations in the base currency of the Fund – the Ghana Cedi.

Interest rate risk

- This directly affects fixed income securities in general i.e. the value of fixed income securities generally falls when interest rates rise.

Liquidity risk

- While the Fund Manager will take adequate steps to ensure that the fund remains highly liquid, there remains the possibility that the fund cannot sell an investment that is declining in value because there are no buyers.

- Periodic statements on the performance of the Fund and individual holdings will be made available to all shareholders via email and post. Shareholders can also contact the Manager of the fund for such information.
